6. Every candidate under class (*ii*) of rule 4 must produce:—

(*a*) An affidavit sworn by his father before a competent authority of his own district or of the district where he is at present residing declaring that the candidate has never read at any school, recognised or unrecognised, his date of birth and age on 1st March 1936.

(*b*) A certificate duly signed or countersigned by a respectable gentleman that he prosecuted a regular course of studies and has been subject to proper discipline.

(*c*) A certificate duly signed or countersigned by a gazetted Government officer in Bengal to the effect that he did not join any recognised or unrecognised school since his boyhood.

PRACTICAL.

Construction of an angle equal to a given angle.

Construction of parallels to a given straight line.

Construction of triangles with given parts.

Division of a straight line into a given number of equal parts.

Construction of a parallelogram equal to a given triangle and having one of its angles equal to a given angle.

Construction of a triangle equal in area to a given rectilineal figure.

Construction of a tangent to a circle.

Easy extensions of these constructions may be given as problems.

Candidates may be required to give the reasons for any particular construction involved in any question.

Every candidate is required to provide himself with the following:—a hard pencil, dividers, pencil compasses and a straight ruler showing centimetres and inches.

THEORETICAL.

Angles at a Point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles and the converse.

If two straight lines intersect the vertically opposite angles are equal.

Parallel Straight Lines.

If a straight line, cutting two other straight lines, makes—

(i) the alternate angles equal,

(ii) two corresponding angles equal,

(iii) the interior angles on the same side of the line supplementary,

then the two straight lines are parallel, and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

Triangles and Rectilineal Figures.

The sum of the angles of a traingle is equal to two right angles.

If the sides of a convex polygon are produced in order, the sum of the angles so formed is equal to four right angles.

Two triangles are equal in every respect—

(i) if two sides and the included angle of one triangle are respectively equal to two sides and the included angle of the other;

(ii) if two angles and a side of the one triangle are respectively equal to two angles and the corresponding side of the other.

If two sides of a triangle are equal, the angles opposite to the sides are equal and the converse.

Two triangles are equal in every respect, if the three sides of one triangle are respectively equal to the three sides of the other.

Two right-angled triangles are equal in every respect, if they have their hypotenuses equal and one side of the one equal to one side of the other.

If two sides of a triangle are unequal the greater side has the greater angle opposite to it and the converse.

Any two sides of a triangle are together greater than the third.

Of all the straight lines that can be drawn to a given straight line from a given point outside it the perpendicular is the shortest.

The opposite sides and angles of a parallelogram are equal; each diagonal disects the parallelogram and the diagonals bisect one another.

If there are three or more parallel straight lines and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are equal.

Areas.

Parallelograms on the same or equal bases and of the same altitude are equal in area.

Triangles on the same or equal bases and of the same altitude are equal in area.

Equal triangles on the same or equal bases are of the same altitude.

Illustrations and explanations of the geometrical theorems corresponding to the following algebraical identities:—

$$k\,(a+b+c\ldots.)=ka+kb+kc+\ldots.$$
$$(a+b)^2=a(a+b)+b(a+b).$$
$$a(a+b)=a^2+ab.$$
$$(a+b)^2=a^2+2ab+b^2.$$
$$(a-b)^2=a^2-2ab+b^2.$$
$$a^2-b^2=(a-b)(a+b).$$

The square on a side of a triangle is greater than, equal to, or less than, the sum of the squares on the other two sides, according as the angle contained by those sides is obtuse, right or acute. The difference in the cases of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

Loci.

The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

The Circle.

A straight line drawn from the centre of a circle to bisect a chord, which is not a diameter, is at right angles to the chord; conversely, the perpendicular to a chord from the centre bisects the chord.

There is one circle, and one only, which passes through three given points not in a straight line.

In equal circle (or in the same circle) (*i*) if two arcs subtend equal angles at the centre, they are equal; (*ii*) conversely, if two arcs are equal, they subtend equal angles at the centre.

In equal circle (or in the same circle) (*i*) if two chords are equal, they cut off equal arcs; (*ii*) conversely, if two arcs are equal, the chords of the arcs are equal.

Equal chords of a circle are equidistant from the centre, and the converse.

The tangent at any point of a circle is perpendicular to the radius through the point.

If two tangents are drawn to a circle from an external point, (*i*) they are equal, (*ii*) they subtend equal angles at the centre of the circle.

If two circle touch, the point of contact lies on the straight line through the centres.

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.

Angles in the same segment of a circle are equal; and if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on a circle.

The angle in a semicircle is a right angle; the angle in a segment greater than a semicircle is less than a right angle; and the angle in a segment less than a semicircle is greater than a right angle.

The opposite angles of any quadrilateral inscribed in a circle are supplementary and the converse.

If a straight line touch a circle and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segments.

If two chords of a circle intersect either inside or outside the circle, the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

On the Concurrence of Straight Lines in a Triangle.

(*i*) The perpendiculars drawn to the sides of a triangle from their middle points are concurrent.

(*ii*) The bisectors of the angles of a triangle are concurrent.

(*iii*) The medians of a triangle are concurrent.

(*iv*) The perpendiculars from the vertices of a triangle to the opposite sides are concurrent.

The order in which the theorems are stated in the above schedule is not to be regarded as essential.

In the proof of theorems and deductions from them, it shall be permissible to use hypothetical constructions.

The ordinary symbolical abbreviations may be used.

introduced in the Bengal Legislative Council, Reports of Select Committees presented or to be presented to that Council, and Bills published before introduction in that Council.

BENGAL LEGISLATIVE COUNCIL DEPARTMENT.

NOTIFICATION.

No. 2938L.C.—25th July, 1935.—The following Minute of dissent by Munindra Deb Rai Mahasai, M.L.C., on the Bengal Development Bill, 1935, is hereby published for general information:—

Minute of dissent by Munindra Deb Rai Mahasai, M.L.C., on the Bengal Development Bill, 1935.

I welcomed this Bill as a beneficient measure when it was first introduced in the Council, but at the same time I did not fail to point out that it was not an ideal one and was capable of improvement in the Select Committee stage. As I was in Europe when the Select Committee sat at Darjeeling I could neither participate nor listen to the discussions that took place at that stage. I think it is the primary duty of Government to provide for irrigation of the country under its charge and not to tax the people for the same, but in the present circumstances no improvement is possible without further taxation. I think Government should not share any profit accruing from improvement of land but may recover the amount of actual cost incurred with interest on the capital invested. I have also got objections to some of the provisions of the Bill which I intend to submit when the Bill will come up to the House for discussion.

NOTE.—Since the 1st January 1929 the datum of all gauges has been finally altered to refer to the Bengal Public Works Department datum which is 6·25 feet ab[ove K]idderpore Old Dock Sill. The values of the highest and lowest readings have similarly been altered. Printed notes on the correction to be applied to all reduced levels recorded since each gauge was established have been prepared.

*The zero of the Buxar gauge has been checked from the G. T. S. Bench marks Nos. 125 and 126 on line 70K and found to be 169·91 feet above the Ben[gal P. W.] D. datum.

†On and from 1st January 1931, High water level and Low water level readings are shown at Swarupganj.

(A) The value of the zero of gauge at the station was 34·55 from 1st May 1935 to 9th May 1935 and 31·65 from 10th May 1935 to 31st May 1935. Hence [the] height above zero of gauge at the station is twice shown thus :—From 1st May 1935 to 9th May 1935—·70 and from 10th May 1935 to 31st May 1935—3·88.

R. B. KHAMBATA, M.R.C.S. (ENG.), L.R.C.P. (LOND.), D.P.H. (CAMB.), *Director of Public Health, Bengal.*

Calcutta, the 26th July 1935.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 26th July 1935.

Forecast of the Summer Til (Sesamum) Crop of Bengal, 1935-36.

(*Note.*—On an average of the five years ending 1932-33, the area under til in Bengal has represented some 2·4 per cent. of the total area under til in British India.)

Character of the season.—The weather was, on the whole, unfavourable both for the period of sowing and growing in North and West Bengal. As a result outturn was reduced. In East Bengal, on the other hand, occasional showers facilitated sowings and growth thereby increasing the area and outturn generally.

Acreage.—The area sown this year is estimated at 115,200 acres as against 107,300 acres last year.

Outturn.—From the District Officers' estimates the average outturn of the crop for the province works out at 81 per cent. of the normal this year as against 77 per cent. last year.

Taking the normal yield as 7 2/5th maunds per acre, the gross outturn of the crop for the province is estimated at about 25,400 tons this year as against 22,500 tons last year.

Director of Agriculture, Bengal (offg.).

Resolution on the report on the Administration of the Jail Department of the Presidency of Bengal for the year 1934.

GOVERNMENT OF BENGAL.

Political Department.

Jails.

CALCUTTA, THE 25TH JULY 1935.

RESOLUTION No. 3361P.J.

Read—

The Report on the Administration of the Jail Department of the Presidency of Bengal for the year 1934.

Read also—

The reports for the years 1931, 1932 and 1933 and the resolutions of Government thereon.

1. It was pointed out last year that the decrease of civil disobedience prisoners had not been accompanied by any corresponding decrease of ordinary prisoners during 1933. During 1934, the admissions exceeded those of 1933 by 3,185 (including transfers) and the average daily strength rose from 21,405·39 to 21,850·57, the highest average of any year during the past decade, except 1932. Although the two special jails at Dum Dum and the one at Hijli started during the civil disobedience period, were kept open, all the central jails and most of the district jails were consistently overcrowded resulting in great strain upon the administrative staff. It seems clear now that there is no hope of the jail population being reduced again to the level of the average of the years preceding 1930, and it has become imperative that steps should now be taken to increase the permanent accommodation in the jails to cope with a permanently increased jail population.

In spite of the increase in the number of prisoners, however, the total cost of guarding and maintenance fell from Rs. 29,44,204 in 1933 to Rs. 29,07,789, the average cost per head being Rs. 129-4 against Rs. 133-9 in 1933. It is gratifying to find that the cost of maintenance and guarding has thus increased by 14 per cent. only, though the average daily population has increased by 56 per cent. over that of 1929.

2. The number of terrorist prisoners at the close of the year was 445 against 350 at the close of the preceding year, the number admitted during the year being 761 against 741 of the previous year. Thirty-nine were deported to the Andamans, of whom 27 were from Bengal. Five were repatriated on medical grounds and for release. The presence of so many terrorists in jails was a source of constant anxiety, for they continued to defy jail rules and the directions of the jail authorities, to make plans for escapes, and to attempt to seduce the weaker among the warder staff. In June 1934 two terrorist convicts escaped from the Midnapore Jail, while soon after, three terrorist undertrials escaped from the Rampurhat subjail. All these were recaptured. These escapes were followed, on the 31st July, by the escape of four undertrial prisoners of the Inter-Provincial Conspiracy case from the Alipore Central Jail. One was recaptured the following day, but the remainder had not been traced when the year closed. It is evident that the custody of terrorist prisoners presents special features very different from those of the ordinary prisoners, and that precautions which are good enough for the latter do not suffice for the terrorist The lack of adequate accommodation, ordinary and cellular, makes segregation from other prisoners and from each other difficult. Since the close of the year projects for the extension of cellular accommodation in two of the central jails have been sanctioned, but though they will ease the situation they will not in any sense be adequate to requirements.

3. The earthquake of the 15th January caused extensive damage to the jail buildings at Darjeeling. The shock was so severe that the major portion of the wall on the north side of the jail, the warders' barrack on the north side, the main wards and the major portion of the perimeter wall collapsed beyond repair. There was, fortunately, no loss of life either among the staff and their families, or the prisoners. The latter, however, were panic-stricken, and had to be collected in the yard away from all structures, and locked up for the night in the two worksheds, in the cells and in the hospital None attempted to escape. The jailer and deputy jailer remained in the jail throughout the night supervising guarding, and the work of the warder staff was commendable.

The jails at Jalpaiguri and Dinajpur were also damaged by the earthquake but the damage was comparatively slight.

4. It is gratifying to learn that as a result of the instructions issued last year, the number of boys sent to the

Borstal School at Bankura instead of to jail has been steadily increasing. The number of admissions during the year under review was 172 against 90 in the previous year, and the average daily attendance rose from 177·32 in 1933 to 214·64. The programme of education consists of literary, physical and industrial training supplemented by moral and religious instruction. Though the general standard aimed at is the primary school stage, boys who are fit for higher education are given instruction up to the Matriculation standard. One hundred and ninety-seven boys appeared at the annual examination held by the Education Department of whom 153 passed, and 7 boys read for the Matriculation Examination of 1935 during the year under report. It is reported that about 75 per cent. of the boys were illiterate on admission, but all of them received instruction up to the primary standard by the time of their release. The number of orders received from outside was sufficient to keep the boys engaged in all branches of industries in which they receive training, throughout the year. On the physical side, regular exercises were given daily under a paid Drill Instructor and boys were allowed to play football, hockey and cricket, among other games, and in matches against outside teams. A beginning has been made with a scout troop which it is hoped to develop gradually. Fifty-two boys were released on licence during the year, and 20 on expiry, of whom 50 (46 on licence and 4 on expiry) were sent to the Aftercare Association at Alipore. It is gratifying to learn that the greater part of them are reported to be leading steady lives. The success of the Borstal treatment must depend in a large measure on the guidance and assistance given to the offender subsequent to his discharge from the school, and while congratulating the Aftercare Association at Alipore on the good work done by them during the year, the Governor in Council hopes that District Officers will endeavour to form Aftercare associations in those districts in which they do not at present exist. The Governor in Council is glad to learn that the Visiting Committee of the Borstal School visited the school regularly and took great interest in its welfare.

5. It is a matter of serious concern that the number of juvenile convicts shows no tendency to drop. This class of the jail population is peculiarly sensitive to political agitation, and the increase in numbers in 1930 and 1932 was directly attributable to the general spirit of lawlessness which prevailed in those years as the figure given below will show:—

Age.	Years						
	1928.	1929.	1930.	1931.	1932.	1933.	1934.
Under 16 ..	75	180	710	165	269	131	151
16—21 ..	2,010	2,459	5,628	3,881	5,921	5,227	5,210

The Civil Disobedience Movement has been called off, but its aftermath remains, and probably accounts for the larger number of youths between 16—21 who resort to crime. It may be hoped that as the economic situation improves and the political situation gets more settled there will be some decline in their number, but it is unlikely that it will ever get back to what it was before 1930, and it seems likely that it will be necessary in the near future to have more institutions of the Borstal type. Meanwhile, subject to the limitations of accommodation and funds, special arrangements are being made for them as far as possible. The former female jail at Berhampore has been set apart for juveniles and something on the lines of Borstal training is being attempted. The prisoners are given primary education and physical training there under paid teachers, while instruction in useful handicrafts, such as weaving, tailoring, carpentry, etc., is imparted by well-behaved convict teachers. Lack of funds has so far stood in the way of replacement of such instructors by a paid agency from outside. In the Alipore Central Jail rudimentary lessons in the vernaculars and English as well as industrial training and physical instruction are being given to adolescent criminals. In the Presidency Jail only primary education is imparted to this class of prisoners.

6. The long detention of undertrial prisoners has been the subject of annual comment for several years past. It is, therefore, pleasant to record a distinct improvement in this respect in some of the districts, *e.g.*, Midnapore, 24-Parganas, Mymensingh, Faridpur, Bakarganj and Tippera. But there are other districts which show a deterioration in respect of undertrials both in Sessions and in Magistrates cases, the most notable of which are Hooghly, Dinajpur, Pabna, Bogra, Rajshahi (Sessions cases only), and Chittagong. It is clear that continued vigilance is called for both on the part of District Magistrates and District Judges, specially as the admission of undertrials has gone up very considerably in recent years, and is far in excess of the accommodation available for them.

7. Last year it was noticed with regret that the number of short-term sentences of less than one month had increased from 9,166 in 1932 to 10,714 in 1933, which was 60 per cent. higher than the number imposed in 1929. During the year under report the number increased still further to 13,629. The explanation probably is that there has been a large increase in petty crime, and in Railway cases, in which fines are difficult to realise. Nevertheless, it must be reiterated that such sentences are neither deterrent nor reformative, and the Governor in Council trusts that trying courts will realise the harmful effect of bringing the chance offender into contact with the real criminal by sentences of this kind, and will try to avoid them by the imposition of alternative punishments.

8. The presence of a large number of terrorist prisoners, and the serious overcrowding to which reference has been made in the preceding paragraphs, must necessarily both impose a very serious strain on the guard staff, which includes a large number of men recruited on a temporary basis to cope with the overcrowding, and also have untoward effects on discipline. It is not surprising, therefore, that the number of dismissals in the warder staff should have risen from 49 in 1933 to 58 in the year under report. But the total of dismissals was a good deal below the figure for 1932, which was 99, and considering the large number of the temporary staff, the increase is not more than might be expected. It is satisfactory that the general standard of recruits continues to improve, and that steps are being taken to improve the standard of efficiency among head warders. Five senior warders (one from each circle) are being trained at the Police Training School, and it is expected that on their return it will be possible to make improvements in the efficiency of the whole force.

The general discipline among ordinary convicts continued to be satisfactory.

9. The Governor in Council has read with interest of the improvement effected recently in the libraries in the central jails. With a larger influx of literate and educated prisoners it is necessary that the jails should provide sufficient reading matter for those who want to use their spare time in this manner. Government have had occasion recently to review this matter and have directed that steps should be taken to improve the existing jail libraries and to start new libraries in district jails.

10. The net earnings from the jail industries increased from Rs. 3,30,050 in 1933 to Rs. 3,40,535 in spite of trade depression. The woollen factory at Dacca continued to do well and received orders from State jails. The profits of the jail depot increased slightly though unfortunately it lost a valuable order for blankets from the Indian Store Department.

11. The Governor in Council regrets to note that sickness and mortality increased during the year. The total number of deaths was 282 and the death rate was 12·91 per mille against 10·8 per mille in 1933. The daily average sick rate was 788·9 against 761·98 in 1933. The increase in deaths is chiefly under dysentery, and pneumonia and other respiratory diseases, and appears to point to the effects of overcrowding. On the other hand, variations do occur from year to year for which there is no adequate explanation. Thus in 1930 and 1932 when the jails were greatly overcrowded, the death rate per mille was respectively 9·3 and 10·52, while in 1929 when the jail population was several thousands less, the ratio per mille was 12·2. This is a matter, however, which the Inspector-General should continue to watch vigilantly.

12. For reasons which have already been explained the conditions in the jails were still abnormal, and credit is due to the jail staffs for the manner in which they have carried out their difficult tasks. His Excellency in Council has read with particular pleasure the names of officers who have been mentioned in the report of the Inspector-General for their good work, and he also takes this opportunity to record his satisfaction with the manner in which Lt.-Col. R. E. Flowerdew, and Lt.-Col. M. A. Singh, respectively, administered the department during the year.

Order.—Ordered that a copy of this resolution be forwarded to the Inspector-General of Prisons, Bengal, for information and guidance.

Ordered that a copy of the report be submitted to the Government of India in the Home Department.

Ordered that a copy of this resolution be forwarded to the Judicial and Education Departments of this Government, for information.

Resolution on the Annual Reports of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College for the year 1933-34.

GOVERNMENT OF BENGAL.

Department of Agriculture and Industries.

Veterinary.

CALCUTTA, THE 24TH JULY 1935.

RESOLUTION—No. 3658 Very.

Minister-in-charge: The Hon'ble Nawab K. G. M. Faroqui, of Ratanpur.

Read—

Annual Reports of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College for the year 1933-34.

I—Civil Veterinary Department.

The year under review was a comparatively healthy one for the live-stock of the province, the mortality being less than that of the previous year.

2. The usual programme of preventive inoculation by the "Serum Alone" method for dealing with outbreaks of rinderpest was carried out with success, and 103,123 animals were protected by this method. But this method confers short immunity and is relatively costly. Experiments were carried out for finding out new and improved methods of prophylaxis having regard both to efficiency and practicability in the field. As a result the new "Goat Tissue Vaccine" method has been found to be very efficacious, while its cost is approximately 1/50th of that of the "Serum Alone Method." During the year 28,912 animals were protected by this new method.

3. A new dispensary was opened at Satkania during the year. The facilities for veterinary aid in the ordinary care of animals in the mufassal are still inadequate, but it is gratifying to note that interest is being taken by some local bodies for the construction and improvement of veterinary dispensaries.

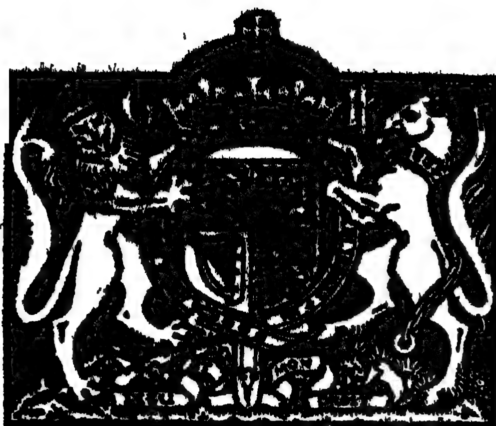
4. His Excellency acting with the Minister in charge notes with pleasure the names of the officers of the department who did good work during the year and desires to acknowledge also the efficient way in which Mr. Kerr discharged his duties.

II—Bengal Veterinary College.

5. The College continued to attract a large number of candidates for admission from various parts of India and from outside it. There was also an increase in the number of entrants from Bengal. It is gratifying to note that the number of stipends awarded by the district boards in this province increased from 15 in 1932-33 to 20 in the year under review.

6. During the year a revised curriculum was introduced at the College which incorporated several new subjects to enable the veterinary graduates to keep abreast of the development of veterinary knowledge. The title of the College diploma was also changed from "Graduate of the Bengal Veterinary College" to "Graduate in Veterinary Science."

7. As usual the report of the Principal furnishes an interesting account of the activities in various branches of the College and hospital showing the usefulness of the institution as a centre for the spread of veterinary knowledge.



8. The Governor acting with the Minister in charge is pleased to notice the good work done by the Principal, Mr. MacGregor. The names of members of the College staff who have been commended for good work have also been noted. He is also pleased to acknowledge the services rendered by the non-official members of the Committee of Management.

7. Every declaration must state the description and true place of abode of the declarant, and where the fact stated in a declaration is not within the personal knowledge of the declarant, the source of the information and grounds for the belief of the declarant in its truth must be accurately and fully stated.

8. (*1*) The abstract and all other documents bearing on the case together with any complaint that may have been lodged shall be submitted by the Registrar to the President, who shall, if he thinks fit, instruct the Registrar to ask the Practitioner by means of a registered letter for an explanation within a time to be fixed by the President. The Committee shall have power to cause further investigation to be made and further evidence to be taken and, if necessary, obtain further legal or other advice.

(*2*) The Committee shall report to the Council, and if the Council consider that the case is one in which an enquiry ought to be held by the Council, the President shall direct the Registrar to take steps for the institution of an enquiry and for having the case heard and determined by the Council.

If the Practitioner produces no evidence, the complainant will not be heard in reply, except by special leave of the Council.

(5) Where a witness is produced by any party before the Council, he will be first examined by the party producing him, and then cross-examined by the adverse party, and then re-examined by the party producing him. The Council may decline to admit in evidence any declaration where the declarant is not present for, or declines to submit to, cross-examination.

(6) The Chairman of the meeting may put questions to any witness, and members of the Council, through the Chairman, may also put questions to any witness.

16. Where there is no complainant, or no complainant appears, the order of procedure shall be as follows:—

(*2*) If the Council, by a majority of two-thirds of the members present and voting at the meeting, find the Medical Practitioner guilty of infamous conduct in a professional respect, the Council shall direct the Registrar not to register his name, if he be an applicant for registration, or to remove his name from the Register of Registered Practitioners, if he is already a Registered Practitioner or to warn or to censure him.

18. When the registration of the name of any Practitioner is refused, or when the name of any Registered Practitioner is removed from the Register in accordance with the provisions of the preceding rules, the Registrar shall forthwith send notice of such refusal or removal to the Practitioner, by a registered letter addressed to his last known address. The Registrar shall also send, forthwith, intimation of any such refusal or removal to the body or bodies from whom the Practitioner received his qualification or qualifications, and shall request them not to admit him without previous reference to the Council to any examination for any new qualification, which is registrable in the Register of Registered Practitioners. If a name is removed from the Register, the Registrar shall issue a notification in the *Calcutta Gazette* announcing the removal and forward a summary of the proceedings and findings to the medical journals for publication.

Rules under clause (*d*)(ii) of sub-section (2) of section 33 of the Act.

19. An appeal to the Council, preferred under section 23 of the Act, against a refusal of the Registrar to register the name or any title or qualification of any person on the Register of Registered Practitioners, shall be in writing and shall state the grounds on which registration is claimed, the names of the qualifications, and the dates on which and the authorities from whom they were received.

1. A pay bill may be submitted to the Accountant-General five days before the last working day of the month by the labour of which the pay is earned.

2. Bills are liable to be delayed in reaching the Audit Office if sent by post or forwarded in a closed cover. They should, therefore, so far as possible, be presented by *hand* or in an open *cover* at the Receiving Counter of the Audit Office.

3. In exchange for each bill so presented a metal token will be issued, which should be produced when payment is called for.

4. A pay bill may, if desired, be enfaced for payment to a Banker or Agent and submitted for collection through such Banker or Agent; this will obviate the necessity of the officer's attendance in person or by messenger, as payment may then be made direct to the Banker or Agent..

5. All pay bills are paid by cheques issued on the Imperial Bank of India if the amount exceeds Rs. 20 or in cash if the amount is not more than Rs. 20.

6. When payment is to be made by crossed cheque sent by post, the cheque will be sent by the Audit Office without further action on the part of the payee. He must, however, acknowledge its receipt by return of post. Failure or delay to do this will render the drawer liable to forfeit this privilege. When payment is to be received in person or through messenger, an intimation will be given as soon as possible after the bill is passed. It is not necessary that an intimation should have been received by the payee before he can be paid. The payee can send his messenger with the receipt (and token and intimation if issued) in the following form:—

"Received by Cash/Cheque Rs....................
from the..
in payment of my pay bill No......................
dated...................................193 . for............
...............193 ."

7. When exemption is claimed in respect of any amount paid to an Insurance Company, the original receipt of the Company for the amount paid or an attested copy thereof should be attached to the pay bill. The receipt will be returned with the cheque.

8. The period for which a subscription to a Fund is due should be specified when it differs from the period for which pay is drawn.

9. The fund deductions of a Covenanted Civil Servant are taken upon his allowances before deductions on account of Civil Service Provident Fund.

10. The Government of India exercises no supervision over the management of the Hindu Family Annuity Fund, the General Family Pension Fund and the Bengal Christian Family Pension Fund and is in no way responsible for their solvency.

11. In the case of officers entitled to Sterling Overseas Pay, fund deductions are based on the Rupee pay *plus* the Rupee equivalent of the Sterling Overseas Pay.

12. When the deduction on account of income-tax shown in the bill includes tax calculated on Sterling Overseas Pay, the details of the calculation, on which the deduction is based may be given at the foot of the bill or, if there be no space at the foot, in some other suitable place; the total being brought into the body of the bill in the appropriate place and the two entries connected with a letter mark or otherwise. The details should show the sterling amount of the Overseas Pay as also its Rupee equivalent.

Note 1.—Audit Officers should see that all compulsory deductions including those for the I. C. S. Provident Fund are duly made and the schedules showing particulars of all fund deductions are attached to the pay bills.

Note 2.—Subscribers to the Sterling Branch should note on the bill and in Fund schedule attached to the bill that the recoveries relate to the Sterling Branch.

(*a*) no such adult worker shall be employed on a Sunday,

(*b*) the periods for work of such adult workers shall be within the limits of 6 a.m. and 6 p.m. or in the case where the Chief Inspector by order in writing so directs, within the limits of 7 a.m. and 7 p.m., and

A

BILL

further to amend the Calcutta Municipal Act, 1923.

WHEREAS it is expedient further to amend the Calcutta Municipal Act, 1923, in the manner hereinafter appearing; (Ben. Act III of 1923.)

It is hereby enacted as follows:—

(Short title.) **1.** This Act may be called the Calcutta Municipal (Amendment) Act, 1935.

(Amendment of section 228 of Bengal Act III of 1923.) **2.** In section 228 of the Calcutta Municipal Act, 1923, for the words "one hundred feet" the words "two hundred feet" shall be substituted.

J. W. McKAY,
Secy. to the Bengal Legis. Council.

STATEMENT OF OBJECTS AND REASONS.

Section 228 of the Calcutta Municipal Act, 1923, at present empowers the Corporation of Calcutta to require the owner of any premises to obtain a sufficient supply of water, provided such supply can be furnished from a main not more than one hundred feet distant from the nearest part of such premises. The object of this Bill is to amend this section so as to give power to the Corporation to direct the owner to obtain a sufficient supply of water from a main situated within 200 feet from the nearest part of the premises, with a view to en[illegible] an adequate supply of filtered water in *bustees*.

NOTIFICATION.

No. 3042L.C.—1st August, 1935.—In pursuance of the provisions of rule 20 of the Bengal Legislative Council Rules, 1920, the following Bill which was introduced in the Bengal Legislative Council on the 30th July, 1935, is hereby published for general information together with the Statement of Objects and Reasons annexed thereto.

THE BENGAL VILLAGE SELF-GOVERNMENT (TEMPORARY PROVISIONS) BILL, 1935.

A

BILL

provi[illegible] [illegible]n matters in connection with certain elections fo[illegible] [illegible]oards held before the commencement of the [illegible] [illegible]age Self-Government (Amendment) Act, 1935.

[illegible] [illegible] it is expedient to make special provision [illegible]ssion [illegible] of office of members of union boards in certain [illegible]nces un[illegible] which general elections were held before the com[illegible]ent of the Bengal Village Self-Government (Amendment) Act, 1935, and for the removal of any doubts as to [illegible] validity of such elections and of appointments of [illegible]mbers made in such cases;

Ben. Act VIII of 1935.

It is hereby enacted as follows:—

1. This Act may be called the Bengal Village Self-Government (Temporary Provisions) Act, 1935.

[illegible] of office of members of union boards in certain cases, and validity of certain elections and appointments.

2. Notwithstanding anything contained in the Bengal Village Self-Government Act, 1919—

Ben. Act V of 1919.

(*1*) Where a general election has been held for a union board before the commencement of the Bengal Village Self-Government (Amendment) Act, 1935 (hereinafter referred to as the amending Act), but after such election the first meeting, at which a quorum is present, of the newly elected and appointed members of such union board has not been held, the term of office of the formerly elected and appointed members of the union board shall be governed by the provisions of section 11 of the Bengal Village Self-Government Act, 1919, as if it had not been amended by clause (*1*) of section 6 of the amending Act.

(*2*) Where a member has been duly elected at such general election, or has been duly appointed after such general election but before the commencement of the amending Act, such member shall be deemed to be duly elected or appointed, as the case may be, under the Bengal Village Self-Government Act, 1919, as amended by the amending Act, and his election or appointment shall be deemed to be valid for all purposes of the said Act, as so amended.

J. W. McKAY,
Secy. to the Bengal Legis. Council.

STATEMENT OF OBJECTS AND REASONS.

Under clause (*1*) of section 6 of the Bengal Village Self-Government (Amendment) Act, 1935, which came into force on the 4th July, 1935, the term of office of members of union boards has been extended from three to four years. In a number of unions, however, elections have already been held and in a few others appointments also made but the new boards could not be declared as duly constituted before the amending Act came into force; this has given rise to an anomalous position, viz., that the persons, who have been duly elected or appointed and whose election or appointment, therefore, remains valid even after the commencement of the amending Act, will have to wait for about a year before the new boards can be constituted. It is considered that the best way of removing the anomaly will be to have such union boards, duly constituted as early as possible. This Bill accordingly seeks to provide that, in the case of these union boards, the term of office of the formerly elected and appointed members of the union board will, subject to the proviso to section 11 of the Bengal Village Self-Government Act, 1919, expire on the date of the first meeting of the newly elected and appointed members of the Board at which a quorum is present.

Smoke abatement.

[illegible]powers the Cor[illegible]
[illegible]upply of water, p[illegible]

The Commission recognise that smoke abatement, to [illegible] feet distant from must have the co-operation of the owners. Within [illegible]ction so as to [illegible] 25 years Smoke Ordinances have made efficient [illegible] of water fr[illegible] only by following the lines of Combustion Engin[illegible] to en[illegible] whose object is to secure furnaces, etc., which fulfil th[illegible] quirements of efficient combustion, and with which the owners [illegible] with reasonable efforts, comply with smoke requirements and secur[illegible] economic operation. In bygone days, when about half of the heat of the coal and often less was used for making steam, the balance being wasted in smoke and unburned gases, attempt to reduce the smoke under the Act was objected to as unreasonable and oppressive because reducing smoke meant using more coal. There was much in the owner's contention, as the combustion appliances in those days were crude and inefficient. But, in the present front line endeavour, with the achievements of Combustion Engineering in improving the boiler as a heat absorbing machine and the design of furnaces, etc., to improve combustion, 90 per cent. of the heat in coal is transferred to the steam, and there is no difficulty in complying with smoke abatement requirements, if the plant is correctly designed. Properly proportioned furnaces, flues and chimneys are basic factors of efficient smoke abatement, increasing the power of the plant and reducing the overhead and fuel expenses.

Under the Act new plants installed or alterations made to the old must be approved by the Commission. During the year the Commission examined and improved 66 plans of which 50 were made in

the office of the Commmission, covering nearly all types of industrial furnaces. Permission to construct was granted in each case.

Hints to owners and engineers.

Although the Commission acknowledge the assistance they have received from many owners they still find it necessary to point out how much further smoke nuisance could be abated if owners and engineers would make closer observations of the emission of smoke from chimneys under their control. Not only would this have immediate and appreciable results in reducing emission, but it would enable them to avoid too ready (and often unfounded) criticism of the accuracy of the observations made by the inspecting staff of smoke emission from their chimneys.

The inspecting staff make a practice of explaining to owners and engineers how easy it is for them by the exercise of reasonable care and attention to avoid black smoke emission. As no opportunites should be lost of pointing out th[illegible]t emission of black smoke only arises when there is neglect, the ger[illegible]l purport of these instructions to owners and engineers is reproduc[illegible]low.

Coal smoke n[illegible] is the result of the incomplete combustion of coal, that is to [illegible] reason of badly designed apparatus, carelessness in control of [illegible]ecut[illegible] improper stoking, the largest possible amount of fuel is not [illegible]ssion [illegible] into heat, but instead much of it is allowed to pass up and [illegible]nces up [illegible]imney, partly in a gaseous and partly in a solid, but fina[illegible] [illegible]ty-five of [illegible]te.

[illegible]tody, distri[illegible] avoided by refraining from charging too heavily and by [illegible]d often; three shovelsful at a time is the maximum quantity [illegible] be burnt properly. Care should be taken to keep a good fire [illegible] grate according to the size of coal used; bare places allow air to [illegible], causing smoke and loss of steam by cooling.

The proper method is to spread the coal over the whole fire; charge down one side of one furnace only at a time, then fire one side of the other furnace, return to the other side of the first furnace and so on. This method keeps steam, avoids excessive cooling with straining plates, and maintains sufficient temperature to burn the smoke. It also saves coal, which means so much less for the stoker to shovel.

It is essential to open the air grids in the fire doors for a minute after firing. This admits the extra air necessary to burn the gases driven off each charge of coal.

Working an underloaded boiler with partially closed dampers is bound to be a dirty smoky process. It is better to reduce the fire area by covering the back of the grate with fire brick, so as to burn the reduced quantity of coal desired on a smaller bed with full draught.

Care should be taken not to allow all the fire to burn away before cleaning off; a good supply of red coal pushed to the right side of the furnace while the left is cleaned, then pushed back to the left side while the right is cleaned, makes a good starting fire, and lights up a new charge quickly, thereby saving steam and avoiding much smoke.

It is advisable to avoid cleaning off all furnaces at one time (this causes much loss of steam and subsequent forcing) but to wait until each fire has been worked up to its proper thickness and has burnt bright and ready to take the load, before cleaning the next.

If large quantities of coal are thrown on fires after cleaning, the result will be dense smoke and waste. It is better to keep on firing little and often until the fire is up to thickness.

Brickwork should on no account be neglected. Cracks in the side flues, defective setting round boiler fronts and badly fitting dampers quickly ruin the draught power of a boiler, by allowing air to rush in without resistance. No effort should be spared to ensure that air can only gain admittance through the fire grate where it has to overcome the resistance of the firebed. Cold air leakages cause reduced furnace efficiency by spoiling draught, cool the boiler and reduce chimney power by cooling the waste gases.

On receipt of telephone message Inspectors are always ready to asist with advice in cases where on account of mechanical breakdown or other causes it becomes temporarily impossible to prevent smoke.

Domestic smoke.

November heralds the entry of the cold wea[illegible] in Calcutta. It is during this period that the nuisance caused by [illegible] from Calcutta's quarter of a million domestic and other kindre[illegible]ces (without chimneys) becomes greater, on account of atmosph[illegible]tions.

Discharged at ground level, this smoke especially [illegible] weather evenings remains stationary and will not rise for hours.

The atmosphere becomes saturated with poisonous [illegible] maximum damage to health. As already pointed out in pre[illegible] the domestic smoke nuisance is beyond the control of the C[illegible] and before any legislation is feasible an extensive propaganda [illegible] seems needed. During the year the Commission with the help [illegible] Public Health Department and the Ward Health Associations distribu[illegible] posters to the public showing them that to stop smoke more draught w[illegible] required when lighting the fires. The process is very simple, namely, to fan the fire when lit strongly for three or four minutes. No smoke will be in that case emitted. Those who can afford it should certainly instal electric or gas heating appliances and chimneys, and those who cannot should adopt the above simple method.

As the resources of the Commission are inadequate, they earnestly appeal to all public institutions interested in the health of the city to assist them in propaganda and demonstrations, and thereby help to reduce the number of deaths from respiratory diseases which are greater than the total from any other two single diseases during the cold season.

Complaints.

The Commission controls approximately an area of 80 square miles comprising the local limits of the Calcutta Corporation, Tollygunge Municipality, South Suburban Municipality, Garden Reach Municipality and Howrah Municipality. With the present inadequate staff it is difficult to keep in touch with all cases of smoke nuisance. The Commission

has again been indebted to individual members of the public who have brought smoke nuisances to their notice by means of complaints. Seventy-six complaints were made against eighty-three in the last year. Whenever complaints are received immediate enquiries are made and relief given whenever possible. Many of the complaints were made against domestic smoke in respect of which no action can be taken under the Act; but every effort is made by instruction and advice to ameliorate conditions complained of.

Seven statutory warnings were served upon owners of factories for offensive smoke emission. With each intimations were also sent that, if effective remedial action to reduce emission were not taken, legal proceedings would be instituted.

Publicity.

The Commission was again represented at the Calcutta Health Welfare Week. Exhibits showed the evil effects of smoke nuisance and air pollution on the local respiratory mortality, the poisoning of food supplies and the effects on trees, buildings and distant localities. The Calcutta Electric Supply [illegible]rporation and the Oriental Gas Company, greatly assisted this sec[illegible] in displaying smokeless gas and electrical appliances for cooking [illegible]d other domestic purposes, as a permanent solution of the evil[illegible] smoke. The public showed great interest in this section.

Permanent remedies.

Electri[illegible] coke oil and smokeless fuels (low temperature carbonisation).

R[illegible]s (apart from the 100 rice mills using the waste product, raw coal is used. The annual reduction shown in Appendix [illegible]es that it is possible to reduce smoke emission to a negligible [illegible]t, and in many cases it will prove economical to use a smokeless [illegible]m in place of raw coal.

The smoke abatement campaign has been materially assisted by the [illegible]tivities of the Calcutta Electric Supply Corporation who have during the past year further increased the number of their consumers, particularly amongst industrial works.

The number of domestic consumers of electricity has increased by 4,695 whilst an additional 540 heating and cooking circuits have been connected to the company's mains.

The total power of new electric motors connected during the past year in industrial works amounts to no less than 28,600 horse-power, and the greater proportion of this vast increase is represented by the conversion of existing steam engines to electric drives with a resultant closing down of boilers in existence for many years. This results in a corresponding diminution of free smoke emitted in the Calcutta area.

The Oriental Gas Company state that during the year ending 30th June 1934 there was distinct evidence of a turn towards the use of gas for industrial purposes in various ways.

At the same time, many new residential buildings were fitted with complete installations for cooking and water-heating purposes, whilst

for the latter purpose the gas geyser demand has continued to be a marked feature of house and flat seekers. Property owners when renovating their premises frequently instal modern gas appliances.

During the year the number of appliances showed an increase of 762 for cooking, water-heating, steam raising and for a large variety of industrial purposes.

General control by the Commission.

During the year under review the Commission held 12 meetings. The Commission also kept in touch with various Smoke Departments, Fuel, Engineering and Research Institutes of Europe and America.

The average emission of smoke from each factory chimney was the equivalent of ·07 minute of dense black smoke per hour. In 1906 when the work of the Commission commenced it stood at 13·1 minutes per hour.

Detecting offensive chimneys.

Smoke observations of big factories were generally made by the Inspectors from the Central Smoke Observatory which is fitted with a telephone so that owners may be informed o[illegible] the telephone at the actual time of smoke emission. Observations of loco[illegible]tives, steamers, launches and minor industries are made locally.

In 1926 the Commission recommended to [illegible]rnment that smoke observers should be appointed to relieve the In[illegible]s for the duty of inspection, etc., of engineering plants. Admin[illegible] approval was obtained in 1927 to this recommendation, but fin[illegible]gency has prevented this scheme being carried into effect.

During the year action was taken as under:—

Nuisances reported for—

Departmental action—1,216 offences.
Telephone warnings—980 offences.
Inspections and tests—4,575.
Statutory warnings—7.
Prosecutions—12.

The maximum fine imposed for offences under the Act was Rs. 125 and the minimum Re. 1.

Conclusion.

The Commission records its grateful thanks to Smoke Departments, Fuel and Engineering Research Institutions and the technical and local press for assistance freely rendered. Thanks are also due to local owners, managers and engineers, whose co-operation and valuable assistance have greatly helped the Commission and to the technical staff for their energy and loyalty in carrying out the policy of the Commission.

A report on the working of the Bengal Children Act, 1922, the Bengal Suppression of Immoral Traffic Act of 1933, the Reformatory Schools Act of 1897 and the Bengal Borstal Schools Act of 1928.

In publishing this annual report the Governor in Council desires to take the opportunity of expressing his great appreciation of the public service rendered by the various non-official bodies and voluntary associations mentioned in the report, and his recog[illegible]ion of the very valuable contribution which those associations have [illegible] to the work of rescue and reformation. He realises, however, [illegible] with the resources at their disposal they are unable to deal adeq[illegible] with the vast problems which the Acts were designed to solve, [illegible] therefore, that the work which those organisations have [illegible] themselves in the interests of their less fortunate fellow ci[illegible] receive such a measure of sympathy and support as will ena[illegible] not only to maintain, but also to extend their beneficent activiti[illegible] the lasting good of the province.

Order.—Ordered that copies of the resolution be forwarded to [illegible] Director of Public Instruction, Bengal, the Commissioner of Police, Calcutta, the Inspector-General of Police, Bengal, and the Inspector-General of Prisons, Bengal, for information.

Ordered also that the resolution, together with the report, be published in the *Calcutta Gazette*.

By order of the Governor in Council,

H. R. WILKINSON,

Secy. to the Govt. of Bengal.

Report on the Administration of the Bengal Children Act, 1922, the Bengal Suppression of Immoral Traffic Act, 1933, the Bengal Borstal Schools Act, 1928, and the Reformatory Schools Act, 1897, for the year 1934.

The Bengal Children Act extends only to the town of Calcutta, the suburbs and the port of Calcutta, the municipality of Howrah, the police-stations of Bally, Jagacha, Sankrail and Domjur in the district of Howrah and the police-stations of Baranagar, Barrackpore, Tittagarh, Noapara, Khardah, Naihati and Jagatdal in the district of the 24-Parganas. The following sections of the Act have not yet been brought into force in any part of Bengal:—

Section 27(*1*), (*i*), (*ii*), (*iii*), (*a*), (*b*), (*c*), (*d*), (*e*) and (*f*).

Section 27(*2*), (*a*), (*b*), (*c*), (*d*) and (*f*).

Section 28(*2*).

The Bengal Suppression of Immoral Traffic Act, 1933, is in force in the town, suburbs and port of Calcutta.

The Reformatory Schools Act applies to that part of the province in which the Bengal Children Act is not in force.

Boy offenders dealt with by courts in the Children Act area are sent to the Reformatory and Industrial Schools at Alipore and those from outside this area to the Reformatory School at Hazaribagh in the province of Bihar and Orissa under the provisions of the Reformatory Schools Act, 1897.

2. During the year under report, 1,367 children were dealt with by the Central Juvenile Court, Calcutta. The great majority of these were sent up for offences under section 66 of the Calcutta Police Act, but 33 were prosecuted under the Bengal Children Act, 20 under the Bengal Suppression of Immoral Traffic Act and about 110 for theft and similar offences under the Indian Penal Code.

Sixty-five of these children were sent to a school or other place of custody, distributed as follows:—

Reformatory School, Alipore	36
Industrial School, Alipore	14
Gobinda Kumar Home, Panihati	5
Salvation Army Home, Entally	4
Society for the Protection of Children in India	6
Total ...	65

Others were fined or made over to their guardians, while most of those sent up under the Police Act were warned and discharged.

3. The Reformatory and Industrial Schools, Alipore, which are for boys only, are maintained by Government, while the Salvation Army Women's Industrial Home at Entally provides a Reformatory School for girls. The following have been notified as places of suitable custody under section 28(*1*) of the Bengal Children Act:—

(*a*) The Gobinda Kumar Home, Panihati.

(*b*) The Salvation Army Women's Industrial Home, Entally.

(*c*) The Calcutta Protestant Home, commonly called the Fendall Home.

(*d*) The Society for the Protection of Children in India.

4. *Controlling agencies.*—The Director of Public Instruction, Bengal, continued to be the Chief Inspector of Reformatory and Industrial Schools, with Mr. A. Macdonald and Mr. J. M. Sen as Assistant Inspectors. The Inspectress of Schools, Presidency and Burdwan Divisions, was Assistant Inspector of Reformatory and Industrial Schools for Girls.

The places of suitable custody recognised by Government as eligible for grants are inspected by two ladies appointed for the purpose.

5. *Administration.*—The following is a brief summary of the activities of the various institutions working under these Acts:—

(1) *Reformatory and Industrial Schools, Alipore.*—These schools, which have been established by Government under section 6(*1*) of the Bengal Children Act, are under the general administrative control of the Director of Public Instruction, Bengal, while their immediate management is vested in the Superintendent and a Managing Committee appointed by Government under section 7(*1*) of the Act.

The combined institutions have accommodation for 350 boys and the entire cost is met from Provincial revenues.

On 31st December 1934 the number of boys in the Reformatory School was 143 against 138 and 153 on the same date in 1933 and 1932, respectively, and in the Industrial School, the number was 68 against 60 in 1933 and 46 in 1932. The total number of boys in the two schools was thus 199 in 1932, 198 in 1933 and 211 in 1934.

The number of fresh admissions during 1934 was 56 in all—viz., 42 in the Reformatory and 14 in the Industrial School, of whom 49 had been convicted of theft.

One hundred and eleven of the boys in the two schools were Hindus, 90 Moslems, 7 Christians, 1 Jew and 2 Buddhists. The number of Bengali-speaking boys increased from 57 to 60 and of Urdu-speaking boys from 69 to 75, while the number of Hindi-speaking boys remained at 65 as in 1933. Only 62 belonged properly to Bengal, while the rest were natives of other provinces but were either domiciled in Bengal or had come there temporarily, mainly from Bihar and Orissa and the United Provinces.

Thirty-six boys including one released on appeal, were released from the Reformatory School and 4 from the Industrial School on the expiry of their terms. Of these 40, 21 were made over to their guardians on the date of their release and 19 boys, whose guardians were not traceable, were made over to the Bengal After-care Association. Four boys were licensed out. Five licenses which had previously been issued were revoked: in three of the cases this was due to the illness of the boys, the guardians being unwilling to take proper care of them during that period.

Three boys from the Reformatory School escaped but two were recaptured. The general discipline among the boys was good.

The boys are given primary education up to class V, the teaching being conducted in Bengali, Urdu and Hindi, and those of classes III, IV and V are also taught tinsmithy, blacksmithy, weaving, carpentry and tailoring. The examination results during the year showed an improvement on those of previous years.

Every facility is given for moral and religious instruction and observance.

Visits to various places of interest were again arranged and the policy of allowing boys towards the end of their period of detention to spend one or two days at their homes was justified by the results.

The general health of the schools has shown a marked improvement since the introduction of the improved diet in 1932. Games are organized for the boys and physical exercises, including drill and gymnastics, are compulsory; a troop of Boy Scouts has been formed under a Scout Master and they acquitted themselves very creditably in various competitions.

The total expenditure on the schools in 1934 was Rs. 47,032 against Rs. 46,029 in 1933, and the average cost of maintaining and educating each pupil was Rs. 218-1 per annum against Rs. 231-14 in the previous year. This decrease is due mainly to the increase in the number of the boys.

(2) *Gobinda Kumar Home, Panihati*—This Home, which has accommodation for 95 girls, is intended for the reception of Indian girls dealt with under the Bengal Children Act and the Bengal Suppression of Immoral Traffic Act.

In 1934 there were 82 girls in the Home, varying from 3 to 17 years of age, as against 87 in 1933; 74 of them were Bengalis and all Hindus. There were 6 fresh admissions during the year and the number of girls in residence on 31st December 1934 was 75.

There is a primary school attached to the Home. The girls were, as usual, given lessons in needle-work, knitting, cane-work, weaving, nursing and cooking. Their handiwork was reported to be good and artistic.

The general health was good and the conduct of the girls satisfactory.

The cost of maintaining the Home was Rs. 13,405-10-11, of which Rs. 7,878-4-3 was met by a Government grant. The average cost of maintaining a girl was thus Rs. 13-8 a month as against Rs. 12-4 per mensem in the previous year. Of this Rs. 10 was contributed by Government in the shape of capitation grant and the balance was met from private sources.

(3) *The Salvation Army Women's Industrial Home for Girls, Entally.*—This Home also is intended for the reception of Indian girls dealt with under the Bengal Children Act and the Bengal Suppression of Immoral Traffic Act. It has accommodation for 70 girls and the total number of girls in residence during the year 1934 was 729.

Four girls from 10½ to 15½ years of age were sent to the Home by the court in 1934; 3 were Hindus and 1 Muhammadan, all belonging to the province of Bengal and all were rescued from houses of ill-fame. Two were dealt with under section 27 (2) (c) of the Bengal Children Act and the other two under section 14 of the Bengal Suppression of Immoral Traffic Act.

The educational progress of all the girls is stated to have been fair and their health was on the whole good.

The Home received from Government a maintenance grant of Rs. 1,200 in addition to Rs. 3,444-1 on account of capitation grants for the girls sent by the courts. The total expenditure of the Home during the year was Rs. 10,439-8-6 and the cost of maintaining each girl was Rs. 14-5-7 per mensem as against Rs. 14-8-3 in the previous year.

(4) *The Calcutta Protestant Home (Fendall Home).*—This Home is a Rescue Home for European and Anglo-Indian women and girls. The girls, who came to the Home during the year under review, were for the most part in need of protection from undesirable surroundings so that the work in 1934 was largely preventive. Others also needed a home, while they were looking for work. During the year 50 girls left the Home; 2 were married, 17 went into new situations as children's nurses or domestic helps, 20 returned to relatives and 11 were sent to boarding schools.

The girls do all the household work in the Home and are trained in various branches of needlework including dressmaking. They also carry out orders for tea sample bags, jharans and money bags, the girls being paid according to the amount and quality of their work. During the year under review the total amount realised on work done in the Home was approximately Rs. 3,000.

No girls dealt with under the Bengal Children Act or the Bengal Suppression of Immoral Traffic Act were sent to the Home during the year.

The Home received the usual maintenance grant of Rs. 960 from Government, and its income from subscriptions and donations amounted to more than Rs. 6,000.

(5) *Society for the Protection of Children in India.*—The Society dealt with 728 fresh cases in 1934 as against 606 in 1933 and 653 in 1932. Of these 158 were Indians, 115 British, 396 Anglo-Indians and 36 Jews.

The Society placed 67 of these children in schools or institutions, returned 21 to their guardians and themselves undertook the protection or guardianship of 97.

Satisfactory reports have been received of the progress of the girls and boys under the care of the Society and many of those who previously passed through their hands have established themselves in professions and other good employment.

Six children were sent to the Society by the court under the Bengal Children Act.

The Society received the usual maintenance grant of Rs. 1,600 from Government in addition to Rs. 1,939-2-8 as capitation grants.

The total amount disbursed by the Society during 1934 was about Rs. 30,700 against Rs. 30,000 last year.

(6) *Hazaribagh Reformatory School.*—Youthful boy offenders convicted in those districts to which the provisions of the Bengal Children Act have not been extended, were sent, as hitherto, to the Reformatory School at Hazaribagh in Bihar and Orissa.

During the year under report, 1 boy, who had been convicted in Bengal, was discharged under section 14 (*a*) of the Reformatory Schools Act of 1897.

(7) *Bengal After-care Association for Juveniles and Adolescents.*—One hundred and forty-five boys were admitted to the hostel in 1934 as against 248 in the previous year. Sixty-eight of them were received from the Alipore Central Jail, 21 from the Reformatory and Industrial Schools, Alipore, 50 from the Borstal School, Bankura, and 5 from Berhampore Jail.

The decrease in the number of admissions was due partly to the decrease in the number of boys coming from almost all the corrective institutions and partly to the fact that a large proportion of the boys released from the Alipore Reformatory and Industrial Schools were made over to their guardians direct.

The industrial class continued to be maintained in the hostel and boys were given instruction in tinsmithy, book-binding, carpentry, picture mounting, painting of boxes and signboards, *biri* making and net weaving. Twenty-five boys of the hostel were provided with suitable employment, mainly through the efforts of the Association staff.

Discipline in the hostel was, on the whole, satisfactory. Physical exercises and games were provided and the boys were taken on several excursions.

The Association received a maintenance grant of Rs. 2,400 from Government in 1934. It also received contributions from the Corporation of Calcutta and other private sources.

The total receipts of the Association during the year were Rs. 4,970-5-3 against an expenditure of Rs. 4,220-8-10.

Although there has been a steady progress in nearly all directions in the year under report, the lack of adequate financial resources and public interest continues to be the chief difficulty with which the Association has to contend.

The mofussil work of the Association is undertaken by several District Associations which are affiliated and responsible to the Association. Several union boards and local bodies rendered valuable services in organising aftercare work in the districts.

Probation work.—In the year 1934, 259 children were placed on probation. Of these 139 were boys and 120 girls. The boys were principally charged with and convicted of theft and the girls were dealt with under section 27 (2) (*e*) of the Bengal Children Act and under the Immoral Traffic Act. Children convicted of theft are kept on probation for one year and those dealt with under section 27 (2) (*e*) of the Bengal Children Act and under the Immoral Traffic Act are [illegible] probation up to the ages of 16 and 18.

The probation work is supervised by the Children Court Magistrate.

There are two male Probation Officers, who had 67 and 72 boys respectively in their charge during the year under review: they visit them once a week. The Lady Probation Officer had 120 girls, whom she visits once a month. The Probation Officers look after the health, work and conduct of the children and act as their friend and guide in every way. Before a case is disposed of, the Probation Officer makes a thorough enquiry into the antecedents of the children and the suitability of the sureties and of their places of residence.

The 16 Honorary Lady Magistrates, who sit with the Stipendiary Magistrate in the Children's Court by turns, have been very regular in their attendance and have shown great interest in the work.

CALCUTTA, THE 30TH JULY 1935.

RESOLUTION—No. 3774AGRI.

Minister-in-charge: The Hon'ble Nawab K. G. M. Faroqui, of Ratanpur.

Read—

The Annual Report of the Department of Agriculture, Bengal, for the year 1933-34.

Administration.—Dr. G. P. Hector held charge of the department up to 20th September 1933, when he went on leave, and was succeeded by Mr. K. McLean, who held charge during the rest of the year. The post of Assistant Director of Agriculture was held by Mr. F. Smith up to 5th June 1933 during the absence on leave of Mr. McLean and by Mr. M. Carbery, Agricultural Chemist, in addition to his own duties from the 4th July 1933 to the 26th August 1933. On return from leave Mr. McLean held the post from the 27th August 1933 to the 20th September 1933, when he was appointed to officiate as Director of Agriculture, and was again succeeded in the post by Mr. Carbery, Agricultural Chemist, who held charge during the rest of the year. Mr. S. G. Sharangapani, Assistant Economic Botanist, continued to act as Economic Botanist throughout the year.

General.—While the season was on the whole a good one for winter and autumn crops and fair for *rabi* crops, economic conditions continued to be bad and the prices of rice and jute were low. Government were compelled to reduce expenditure by the abolition of five posts of District Agricultural Officer.

The Report of the Bengal Jute Enquiry Committee was published in February 1934. Owing to the divergence of opinion among the members of the Committee on certain essential points Government addressed the Board of Economic Enquiry for advice on certain questions arising out of the report of the Committee. In the meantime more extensive propaganda than in previous years was undertaken in the rural areas through both official and non-official agencies in the hope of persuading cultivators to restrict sowings of jute, but the effect was not appreciable.

Research and experiment.—In this direction the assistance of the Imperial Council of Agricultural Research, coming at a time when the state of provincial revenues forbade expansion, was most valuable, and it was owing to the grants received from the Council that, inspite of the acute financial stringency, it was possible to carry on as many as seven important schemes of agricultural research during the year. These included two new schemes, one for fruit research work at Krishnagar, the other for investigation work into the costs of sugarcane cultivation. The importance of the former scheme lies in the prospect which it offers of increasing the cultivator's income, while the value of the latter scheme can hardly be exaggerated in view of the importance of the cultivation of sugarcane as a substitute for jute.

Work on agricultural research also continued at the Universities of Calcutta and Dacca with grants from the Imperial Council of Agricultural Research.

The practical results of previous researches were evident in various directions. Thus the increase in the area under sugarcane noticed in last year's resolution continued, and was further stimulated by a wide-spread distribution of cuttings under departmental supervision. Three new white sugar mills started work, and their prospects are good. A number of open-pan factories were working, but, generally speaking, they proved profitable only so long as the price of the cane did not rise above four annas a maund.

There was also an increase in the cultivation of tobacco, which was one of the few crops that did not suffer from depressed prices. The practice of growing tobacco for home consumption was increased by a large distribution of departmental seed, but in a large area the crop was unfortunately damaged by hail.

Cultivators throughout the jute districts were urged to grow larger quantities of groundnuts, and their sale appreciably increased.

Animal husbandry.—One of the most pressing questions before the department is the improvement of the cattle of the province. In most districts the local breeds give poor plough-cattle and poor milkers, and the best cattle are those imported from other provinces. While climatic conditions account for this in part there is reason to suppose that it may be possible to go some way towards ending this dependence on other provinces. It was found necessary during the year to close down the Rangpur farm as a measure of retrenchment, but good results were obtained from selected bulls distributed in the Maldu, Rajshahi, Nadia and Hooghly districts and maintained under the supervision of special livestock officers. The results of entertaining this temporary staff have been very promising, and Government hope to extend the system as their finances allow. An essential part of the scheme is the increased cultivation of fodder crops, especially Napier grass.

Research into the problems of animal nutrition continued throughout the year.

Demonstration and propaganda.—Every effort was made to see that the unavoidable retrenchment of staff interfered as little as possible with educative activities. In the districts lantern lectures were given and improved crops demonstrated. The Publicity Department of Government introduced a publicity car with a loud speaker, and the agricultural officers in the districts through which it travelled attended and gave lectures and demonstrations. The practical value of the wireless talks on agriculture given by departmental officers in Calcutta was proved by the applications for seed and for information which they elicited. Exhibitions held at various local centres aroused keen interest, the cultivating classes in particular showing great appreciation of the lectures delivered and the improvements demonstrated.

Agricultural education.—The question of training further batches [illegible] teachers at the Secondary Agricultural School at Dacca in con[illegible] with the scheme for agricultural education in High English and M[illegible] English Schools was not taken up pending examination of the posit[illegible] as regards the working of the agricultural classes in the schools alread[illegible] participating in the scheme. During the year under report there were fifty-six schools teaching agriculture, and 3,030 boys received instructions on the subject—both theoretical and practical.

The training of *bhadralok* youths in practical agriculture at the Faridpur farm with the object of settlement of char land with them in the district was continued. The 6th batch of students came under training on the farm, the 5th batch having already taken up work on the land.

Agricultural engineering.—The Agricultural Engineer was engaged mainly with the question of the improvement and erection of improved sugarcane milling machinery. Improved aerators and grainers, sugar disintegrators and centrifugals were designed by him for use in open-pan factories.

A demonstration factory for the manufacture of sugar on the open-pan system with up-to-date equipment was erected at Rajshahi and a similar factory was established at Malda by the Malda Co-operative Sugar Society.

Sericulture.—On the sericultural side a year of depression resulting from foreign, especially Japanese, competition was also marked by a very considerable curtailment of Government activity. Though they did not accept the Retrenchment Committee's proposals in full, Government were compelled by the state of their finances to reduce expenditure on the department, and consequently one post of Superintendent of Sericulture was abolished and the services of eighteen subordinate officers dispensed with. The nurseries at Tollygunge, Amriti, Kumarpur, Dacca and Surul were closed down, leaving seven nurseries only in the silk-producing districts.

Nevertheless work of value was performed. Study of the question of selecting indigenous *nistari* and *chhotopolu* continued. Attention was paid to increasing the outturn of mulberry leaf and at the same time lowering the cost of its production. The introduction of the tree mulberry as an auxiliary to the bush mulberry progressed. The cost of cultivation of a tree mulberry plantation is much less and the trees stand up better to drought than does the bush mulberry. Demonstration and propaganda continued in the districts of Malda and Murshidabad.

Acknowledgment.—Government in the Ministry of Agriculture have much pleasure in recording their appreciation of the valuable services rendered by Dr. Hector and Mr. McLean in the administration of the department. They have noted the names of other officers—superior and subordinate—commended in the report. The thanks of Government are also due to Professor P. C. Mahalanobis of the Indian Educational Service for his valuable help in advising on the lay-out of experiments and on the statistical examination of results, to the numerous officials and non-officials who helped the department in various ways, and to the members of the Provincial Agricultural Committee and other committees and boards attached to the department for the services rendered by them.

ORDINANCE No. II OF 1935.

AN

ORDINANCE

Temporarily to provide for the deduction at source of income-tax and super-tax.

GOVERNMENT OF INDIA.

Legislative Department.

The following Bill was introduced in the Council of State on the 14th March, 1935 :—

C. OF S. BILL No. 3 OF 1935.

A Bill further to amend the Aligarh Muslim University Act, 1920, for a certain purpose.

WHEREAS it is expedient further to amend the Aligarh Muslim University Act, 1920, for the purpose hereinafter appearing ; It is hereby enacted as follows :— (XL of 1920.)

Short title and commencement.

1. (*1*) This Act may be called the Aligarh Muslim University (Amendment) Act, 1935.

(*2*) It shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, appoint.

Addition of new section 41 to Act XL of 1920.

2. After section 40 of the Aligarh Muslim University Act, 1920, the following new section shall be added, namely :— (XL of 1920.)

Appointment of Pro-Vice-Chancellor not obligatory.

"41. Nothing contained in this Act or in any Statute, Ordinance, or Regulation thereunder shall be deemed to make the appointment or reappointment of a Pro-Vice-Chancellor obligatory and every reference therein to the Pro-Vice-Chancellor shall be construed as referring to the Pro-Vice-Chancellor, if any."

STATEMENT OF OBJECTS AND REASONS.

In accordance with section 16 of the Act, the appointment of a Pro-Vice-Chancellor is obligatory.

During recent years the proposal that the post should be abolished has met with support on financial and other grounds. On the recommendation of the Court, the University, in their letter dated June 2, 1934, requested the Government of India to introduce amending legislation accordingly.

2. The Government of India, however, were reluctant (and so were the Visiting Board) to have the post abolished, as many were of opinion that an educational head of an educational institution was required. The matter was therefore reviewed by the Court at its meeting held in November last and the original proposal was endorsed by 42 votes against 38.

Another effort made to ascertain the views of the Court has elicited the information that opinion is more or less equally divided.

3. After a careful review of the situation, the Government of India have decided to introduce amending legislation whereby the post of Pro-Vice-Chancellor shall be permissive and not obligatory. By this arrangement, it will be possible for the post of Pro-Vice-Chancellor to be filled at times when the University consider such action to be desirable : but the University will *not* be compelled (as now) to fill the post at times when a Pro-Vice-Chancellor does not appear to be required.

GOVERNMENT OF INDIA.

Legislative Department.

The following Bill was introduced in the Council of State on the 18th March, 1935 :—

C. OF S. BILL NO. 4 OF 1935.

A Bill to protect the Milch Cattle.

WHEREAS it is expedient to remove the ordinary preventible causes for the shortage of milch cattle and also the reduction in the quantity of the supply of pure milk in the country ;

AND WHEREAS the slaughter of such cattle for the purposes of trade in dry meat have largely contributed to the said reduction in the milk supply ;

It is hereby enacted as follows :—

1. (*1*) This Act may be called the Indian Milch Cattle Protection Act, 193 .

(*2*) It shall extend to the whole of British India.

(*3*) It shall come into force on the 193 .

2. Milch cattle shall mean and include cows and buffaloes which are giving milk and their she-calves.

3. Any person who sells milch cattle to a butcher or to any other person with the knowledge that such cattle are going to be slaughtered or any person who slaughters a milch cattle either for the consumption of the meat of such cattle within British India or for the purposes of exporting meat of such cattle outside, shall be punished with imprisonment for six months or a fine up to a maximum of Rs. 500 or with both.

[illegible] On conviction for an offence under this Act, the milch cattle meat in respect of which the offence is committed shall be forfeited.

5. All offences under this Act shall be cognisable and bailable and shall be triable in the same manner as prescribed for warrant cases by a magistrate of the first class.

STATEMENT OF OBJECTS AND REASONS.

Pure milk is a staple food required for the nourishment and nutrition of the babies born in this country whose lives are very valuable to the Indian nation as a whole and who are future hopes of the country as well. The increasing scarcity of pure milk largely due to the daily slaughter of milch cattle in the country in considerable numbers have of late contributed mainly to the increased rates in the infant mortality. It is also an every day experience to all of us that pure milk whenever required for invalids and the sick either in the hospitals or in the private houses is not readily available. The ghee and butter supply in the country has also been considerably reduced due largely to the slaughter of milch cattle in large numbers. Consequently, the health of the people in the country has greatly deteriorated and the average longevity of persons living in this country has been considerably reduced. The object of this Bill is to combat these evils as far as possible.

Note.—Since the 1st January 1929 the datum of all gauges has been finally altered to refer to the Bengal Public Works Department datum which is 6·25 feet a[...] Kidderpore Old Dock Sill. The values of the highest and lowest readings have similarly been altered. Printed notes on the correction to be applied to all reduced levels recorded since each gauge was established have been prepared.

*The zero of the Buxar gauge has been checked from the G. T. S. Bench marks Nos. 125 and 126 on line 70K and found to be 169·91 feet above the Bengal P. [...]um.

†On and from 1st January 1931, high water level and low water level readings are shown at Swarupganj.

(A) The value of zero of gauge at the station was 35·23 P. W. D. datum from 1st February 1935 to 12th February 1935 and 34·55 P. W. D. datum from 13th Febr[...]5 to 28th February 1935. Hence the average height above zero of gauge is twice show thus:—from 1st February 1935 to 12th February 1935—3·30 and from 13th February 1935 to 28th February 1935—3·50.

(*a*) Includes figures for the Eden Canal which was amalgamated with the Damodar Canal system during the year under review.

3. **General.**—The total capital expenditure of the department during the year 1933-34 was Rs. 9,12,019 after deducting receipts and recoveries on capital account amounting to Rs. 9,476 as against Rs. 13,24,967 in the previous year. Of this amount, Rs. 9,09,011 was spent on the Damodar Canal Project and the remainder on the Bakreswar Canal, the Grand Trunk Canal and the Madaripur Bil Route projects.

The only important new project under construction during the year was the Damodar Irrigation Canal in the districts of Burdwan and Hooghly. The construction was started in 1926-27 and is now nearing completion. The canal was formally opened on the 2nd September 1933 by His Excellency the Right Hon'ble Sir John Anderson, P.C., G.C.B., G.C.I.E., Governor of Bengal. The head weir at Rondia where the opening ceremony took place has been named after His Excellency the "Anderson Weir." The Canal has been designed to irrigate about 200,000 acres of land in the districts of Burdwan and Hooghly. The works already completed command an area of 41,561 acres, but, owing to the well-distributed rainfall during the kharif season and to the failure of the local cultivators to appreciate the benefits of irrigation by silt-laden canal water, an area of 5,580 acres only came under operation during the year.

The Bakreswar Irrigation Scheme in the district of Bankura, which was taken up in 1927, was completed during the year. The total length of the main canal and distributaries under operation was 21 miles 4,070 feet and the total area under irrigation was 7,361 acres as against an estimated area of 10,000 acres. The area under lease was irrigated satisfactorily and the outturn of crops was the maximum known for many years past in that area.

The newly constructed locks and sluices on the Lower Kumar river (Madaripur Bil Route) were in operation during the year. Although the conditions in the river have changed since the locks and sluices were projected, indications are apparent that they can prove useful in reducing siltation in the river

The Grand Trunk Canal has been held in abeyance. A small capital expenditure was incurred as in previous years on the upkeep of buildings on the acquired land and on petty establishment and tools and plant.

The expenditure on revenue account during the year amounted to Rs. 27,85,699, of which Rs. 2,79,747 was spent on irrigation works proper, the principal items being the Midnapore, the Bakreswar and the Damodar and the Eden Canals. The Eden Canal having been amalgamated with the Damodar Canal system, the account of the former was incorporated in that of the latter during the year under review. The expenditure on the Midnapore Canal was Rs. 1,50,361, which included Rs. 36,341 for maintenance and repairs and Rs. 1,12,763 for overhead charges. The expenditure on the Bakreswar Canal was Rs. 13,680, while that on the Damodar Canal, including the Eden Canal, totalled Rs. 1,05,074. The rest of the expenditure was on navigation, embankment and drainage works. The expenditure on navigation was mainly for (1) upkeep of five big suction dredgers, (2) maintenance of the Hijili Tidal Canal, (3) maintenance of the steamer and boat routes from Calcutta to Eastern Bengal and Assam, including the reconstruction of the bridges over the Calcutta Canals and Tolly's Nala, to the cost of which the Calcutta Improvement Trust and the Calcutta Corporation contributed in certain cases, and (4) conservancy of some of the principal navigable rivers of the province, such as the Ganges, the Dhalleswari and the Buriganga. The expenditure on the Calcutta and Eastern Canals was Rs. 4,83,742 as compared with Rs. 5,05,868 in 1932-33. Reconstruction work was carried out on the Alipore, Chitpore and Ultadanga (now called Ghuznavi) bridges. The expenditure on the Hijili Tidal Canal, the Sundarbans Steamer Route and the Madaripur Bil Route was Rs. 74,606, Rs. 82,905 and Rs. 2,79,612, respectively, as compared with Rs. 39,469, Rs. 1,02,176 and Rs. 2,41,919 in 1932-33, while the cost of upkeep of the dredgers amounted to Rs. 2,33,117 against Rs. 2,55,000 in the previous year. The increased expenditure on the Hijili Tidal Canal was mainly due to silt-clearance of Range II and thorough repairs to the Kalinagore and Terapakhia lock gates, while that on the Madaripur Bil Route was due to heavy dredging in the Lower Kumar river. Gross receipts from the Calcutta and Eastern Canals, Hijili Tidal Canal,

Sundarbans Steamer Route and Madaripur Bil Route amounted to Rs. 3,58,018, Rs. 45,515, Rs. 60,002 and Rs. 1,68,199, respectively, as against Rs. 3,90,886, Rs. 61,016, Rs. 57,651 and Rs. 1,95,715 in the previous year. In the case of the Calcutta and Eastern Canals the fall was mainly due to heavy slump in trade, while in the case of the Hijili Tidal Canal it was due to general economic depression, inundation of the Contai subdivision by exceptionally heavy rainfall, which affected inland trade, and closure of Range II of the canal for the purpose of silt-clearance. Diversion of steamer traffic through the Bil Route on account of siltation in the Lower Kumar river and heavy depression in trade are the main causes for the drop in revenue receipts from the Madaripur Bil Route.

The total revenue receipts and working expenses of the department during the year were Rs. 12,99,423 and Rs. 27,85,699, respectively, as against Rs. 10,57,651 and Rs. 24,40,231 in the previous year. Though the total receipts apparently increased by Rs. 2,41,772, the actual revenue from different canals further declined for the reasons stated above. The apparent increase in receipts was due to the transfer of certain spare parts of five suction dredgers to stock (suspense), for which credit of Rs. 2,98,962 was taken in the Revenue Account of the dredgers. The value of the spare parts was, however, debited to suspense, which, as well as the increased expenditure on maintenance in the case of certain works, accounts for the increase in working expenses by Rs. 3,45,468.

One of the principal reasons for the high working expenses in this department is the high percentage of establishment charges. This is due primarily to the system of *pro rata* distribution of charges, which has the effect of debiting works with a share of expenditure on the department's general activities. In accordance with the recommendation of the Sub-Committee of the Bengal Legislative Committee on Public Accounts, Government are now considering the revision of the present system of distribution of establishment charges.

As a retrenchment measure, Government also decided to reduce the cadre of the Indian Service of Engineer officers from the sanctioned strength of 30 to 19, and three members of the service were made to retire compulsorily during the year under review. A substantial reduction was also made in the temporary establishment entertained by this department.

There are still a number of administratively approved major schemes which it has not been possible to execute for want of funds. It was not possible to pursue these during the year, and the policy of Government has still perforce been restricted to smaller schemes of local benefit, such as schemes for making small cuts from live rivers in order to introduce a supply of water into the channels of rivers which have deteriorated. The Ghuznavi Cut (from the Mathabhanga to the Nabaganga), constructed during the previous year, has proved efficient and successful, and other schemes of the same kind are now under examination.

The free flushing of malarious areas as a sanitary measure has been continued and extended. This year an area of 14 square miles outside the commanded area of the Eden Canal was flushed. Certain malarious areas comprising 4,900 acres in the Narayangarh and Pingla thanas of the Midnapore district were also thoroughly flushed with the water of the Midnapore Canal. As an anti-malarial measure, these flushing operations have been very beneficial, as indicated by the following spleen indices in the locality:—

Area.	Highest spleen index in previous years.	Highest spleen index in 1933.
	Per cent.	Per cent.
Narayangarh ..	85 (1932)	59
Pingla ..	80 (1931)	57

This department maintained about 1,293 miles of embankment during the year under review. The result of this policy has been the reduction of the flood level in the area concerned, and the feasibility of further progress in this direction is under investigation. The total amount spent on maintenance of embankment and drainage works, such as the Magrahat Drainage Works, the Rajapur Drainage Works, etc., was Rs. 11,42,862 as against Rs. 7,85,822 in the previous year. The increased expenditure was due to the value of spare parts of dredgers being debited to stock (suspense) as also to heavy expenditure on repairing damages caused to certain embankments by floods in the Contai subdivision of the Midnapore district.

The department has also to deal with the protection of towns from river erosion. During the year under review no protective works were undertaken, but the revetment constructed for the protection of Sirajganj was efficiently maintained and periodical observations of the erosion at Noakhali and Chandpur were made.

The department undertakes surveys and investigations with a view to examining the feasibility of working out schemes for irrigation and drainage purposes: it also conducts discharge observations and collects hydraulic data of all important rivers. During the year under review several surveys were continued from the previous year and several new surveys were undertaken. The most important of these were (1) detailed survey of the Subhankar's Danra Project, (2) survey of the Ajoy Canal Scheme, (3) detailed survey of the Darkeswar Reservoir Project, (4) survey of the Messanjore Reservoir Scheme, (5) discharge observations of important streams and rivers in the Bankura and Birbhum districts and (6) survey of the old Brahmaputra river from its junction with the new channel on the north of Mohanganj to Dewanganj and of the Bahadurabad offtake.

The rainfall during the flood season was greatly in excess of the normal. This abnormal rainfall coupled with upland freshets and high sea-tides resulted in high floods in some of the rivers, particularly the Cossye, the Rupnarain and the Kaliaghya. In the Contai subdivision considerable flooding occurred, and large areas in the lower parts of the district were damaged. In order to relieve flood congestion cuts were allowed in Schedule D and Takavi embankments.

No material damage was caused to any work of this department by the earthquake of the 15th January 1934.

The following is a list of important works under execution or in charge of this department:—

4. **The Damodar Canal Project.**—The total capital expenditure (direct and indirect) to the end of the year 1933-34 was Rs. 1,03,25,685 as against the revised estimate of Rs. 78,14,981 sanctioned by the local Government. A second revised estimate, together with an up-to-date financial review of the scheme, has been prepared by the Chief Engineer and is under consideration. The Revenue account of the canal was opened from the 1st April 1933. Revenue and working expenses during the year amounted to Rs. 44,676 and Rs. 1,05,074, respectively.

5. **The Bakreswar Irrigation Scheme.**—The capital expenditure (direct and indirect) to the end of the year amounted to Rs. 7,11,370 as against the sanctioned estimate of Rs. 4,90,596. A revised estimate amounting to Rs. 7,76,452 has been submitted by the Chief Engineer and is now under the consideration of Government.

The gross revenue and working expenses were Rs. 13,710 and Rs. 13,680, respectively. The area irrigated was 7,361 acres.

6. **The Midnapore Canal.**—The canal consists of two weirs at Midnapore and Panskura, 65⅓ miles of main and branch canals used both for irrigation and navigation purposes and 284·97 miles of distributaries and village channels. No capital expenditure was incurred on the canal during the year. The area irrigated was 19,517 acres as against 28,136 acres in the previous year. The diminution in the area irrigated was due mainly to the decrease in demand on account of the fall in the prices of agricultural produce.

The receipts and working expenses were Rs. 1,00,347 and Rs. 1,50,361, respectively, the result being a deficit of Rs. 50,014 as against the deficit of Rs. 43,072 in the previous year. Agricultural depression was the principal cause of the fall in revenue.

7. **The Grand Trunk Canal.**—The project has been held in abeyance since 1927-28. The capital expenditure incurred on the upkeep of buildings on the acquired land and on petty establishment and tools and plant amounted to Rs. 8,870, while receipts and recoveries amounted to Rs. 7,783. The result was a capital expenditure of Rs. 1,087.

8. **The Hijili Tidal Canal.**—This khal with the Terapakhia Pass Khal, Palaboni Khal and the khal leading to the Gewankhali lock entrance constitutes a navigation canal 49¾ miles in length. No capital expenditure was incurred on the canal during the year. The receipts and working expenses amounted to Rs. 45,515 and Rs. 74,696, respectively, as against Rs. 61,016 and Rs. 39,469 in the previous year, the result being a deficit of Rs. 29,181 as against a net revenue of Rs. 21,547 in the previous year. The reasons for the increased working expenses and the further fall in receipts have been explained in paragraph 3.

9. **The Calcutta and Eastern Canals.**—These consist of natural and artificial channels about 834 miles long for maintaining communication between Calcutta and East Bengal. There was no capital expenditure on this system during the year. The receipts and working expenses amounted to Rs. 3,58,618 and Rs. 4,83,742, respectively, as against Rs. 3,90,886 and Rs. 5,05,868 in the preceding year. The result was a deficit of Rs. 1,25,124 as against the deficit of Rs. 1,14,982 in the previous year. The reasons for the further fall in receipts have been explained above.

10. **The Sundarbans Steamer Route.**—This route is about 350 miles long. There was no capital expenditure on the route during the year. The gross revenue and working expenses amounted to Rs. 60,062 and Rs. 82,905, respectively, as against Rs. 57,651 and Rs. 1,02,176 in the preceding year, the result being a deficit of Rs. 22,843 as against the deficit of Rs. 44,525 in the previous year.

11. **The Madaripur Bil Route.**—This route connects the Madhumati and Kumar rivers in the Faridpur district and is about 38 miles in length. A capital expenditure of Rs. 1,589 was incurred during the year on the construction of locks and sluices along the Lower Kumar river. The revenue receipts and working expenses amounted to Rs. 1,68,199 and Rs. 2,79,612, respectively, as against Rs. 1,95,715 and Rs. 2,41,919 in the preceding year. The result was a deficit of Rs. 1,11,413 as against the deficit of Rs. 46,204 in the previous year. The reasons for the increased working expenses and further drop in revenue receipts have been explained above.

12. **Dredgers.**—The dredger "Foyers" was employed on dredging the Lower Kumar and the Attarabanka rivers from the 17th October 1933 to the 19th December 1933 and earned Rs. 17,955 as hire, which was credited to the Revenue Account. It remained idle during the rest of the year. The other dredgers(viz., "Ronaldshay," "Cowley," "Burdwan" and "Alexandra " were laid up throughout the year.

Taking all the dredgers together the receipts amounted to Rs. 3,16,198 which included Rs. 17,955, the hire earned by the "Foyers." The remainder was on account of the credit of the value of the spare parts of the dredgers transferred to "15B.—Stock suspense." The total working expenses amounted to Rs. 2,33,117 as against Rs. 2,55,000 in the previous year.

13. **Minor Irrigation, Navigation, Embankment and Drainage works for which neither capital nor revenue accounts are kept.**—These include the Amjore Weir, the Salbund Weir, the Orissa Coast Canal, the Nadia Rivers, the Magrahat Drainage Scheme, Government embankments and other works enumerated in the list at the end of paragraph 3. The total working expenses on these works during the year amounted to Rs. 13,62,512 as against Rs. 11,34,282 in the previous year. The increased expenditure was due to the debit of the value of the spare parts of the dredgers to "15B.—Stock suspense."

14. **River Training Works.**—Bandalling was done in the rivers Dhalleswari and Buriganga with the objects of maintaining a navigable depth of water during the low water season and of ensuring a supply of good drinking water to the city of Dacca. The work was carried out through the agency of the Joint Steamer Companies with a Government subsidy of Rs. 17,500.

The lower reaches of the Baraitali channel were open to steamer traffic throughout the year, although the offtake was in bad condition during the low water season.

Conservancy operations in the river Ganges between Rajmehal and Goalundo were also undertaken by the Joint Steamer Companies to keep up the line of navigation throughout the year with a Government subsidy of Rs. 18,900.

15. **General economic condition.**—Rainfall was [illegible] and the general economic condition of the country continued to be unfavourable. Trade depression together with the fall in the price of paddy and other commodities again entailed a decrease in receipts from irrigation and navigation works.

Resolution reviewing the reports on the working of district boards and local boards during the year 1932-33.

GOVERNMENT OF BENGAL.

Local Self-Government Department.

CALCUTTA, THE 26TH MARCH 1935.

RESOLUTION No. 2210 L.S.-G.

Minister-in-charge: The Hon'ble Sir Bijoy Prasad Singh Roy, Kt.

Read—

The reports of the Commissioners of Divisions on the working of district boards in Bengal during the year 1932-33.

1. *District boar*[illegible]—There are 26 district boards in this [illegible]esidency. The total number of membe[illegible]ose during the year under [illegible]93 to 696, the increase [illegible] due to [illegible]e reconstitution of the [illegible]paiguri District Board with three additional members. Of these members 449 were elected, 147 were appointed non-officials and 100 were officials—mostly Subdivisional Officers who brought with them their intimate knowledge of the rural areas of their respective subdivisions.

There were elected Chairmen in all the district boards with the exception of three. As usual, the Darjeeling District Board had a nominated official Chairman in the person of the Deputy Commissioners. In Midnapore the District Magistrate was reappointed as Chairman of the district board mainly on the ground that its finances were still not on a sound footing and the affairs of the district board were such as to require the continued personal direction of the District Magistrate. In Bankura the District Magistrate had to assume charge of the district board because the previous Chairmen had permitted the resources of the board to be employed for political and antiGovernment purposes. In the case of Mymensingh the District Magistrate was put in charge of the affairs of the district board to remedy its financial embarrassment and on the reconstitution of the board after a general election, the privilege of electing a non-official Chairman was restored to the board. It is hoped that it may be possible in the near future to do the same in the case of Midnapore and Bankura.

During the year under review 362 meetings were held against 379 in the previous year. Of these 2 proved abortive for want of a quorum and 13 were adjourned, as compared with 2 and 15, respectively, in 1931-32. The percentage of attendance was highest in Dinajpur being 94·2 and lowest in Jalpaiguri and Midnapore being 61·45 and 64·1, respectively. It may be pointed out that on an average more than one-third of the members of these two boards failed to attend their deliberations.

2. *Local boards.*—The number of local boards was 84 as in the previous year. They were presided over by 80 non-official and 4 official Chairmen. The total number of members of local boards was 1,342, consisting of 84 officials, 466 appointed non-officials and 792 elected members. The boards held altogether 686 meetings, against 759 in the previous year. Four meetings failed for want of a quorum and 8 were adjourned. The average percentage of attendance was highest (98·30) at Khulna (Sadar); but low attendance was registered at Katwa (52·77), Gaibandha (50·60), Narayanganj (47·7), Kurigram (46·66) and Nilphamari (36·11). The activities of the local boards were limited owing to the paucity of funds placed at their disposal by the district boards and this not unnaturally resulted in an absence of a real sense of earnestness and responsibility.

In a number of cases the control of pounds was transferred from local to union boards, and the general tendency, as in previous years, was to confine the activities of local boards to the administration of grants for village roads for the repair of unmetalled roads, and (in some cases) for the sinking of tube-wells. Local boards can, however, exercise little supervision over union boards, as there is no connecting link between the two, except that some of the Presidents of

union boards are members of local boards. The union boards, on the other hand, tend to look to the local officials and the district boards for guidance, rather than to the local boards.

The average size of a district is so large that it is not possible for a non-official member of a district board to have that intimate knowledge of the requirements of the rural population which is demanded of him. The average resources of a union board are also too small to enable it to engage the necessary staff and take up the responsibility of looking after important roads and bridges as an agent of the district board.

3. *Union committees.*—There are only 12 union committees in the Presidency, viz., 7 in the Midnapore and 5 in the 24-Parganas districts. Of these only the Contai Union Committee levied a local tax under section 118C of the Local Self-Government Act. The others depended entirely upon allotments from the district boards.

These union committees are an anachronism but they survive in Midnapore because the Village Self-Government Act has not yet been enforced in that district. In the five unions in the 24-Parganas in which union committees continued to function it has not hitherto been possible to form union boards owing to the failure of elections under the Village Self-Government Act in 1930 and subsequently to special circumstances of a local character.

4. *Finance.*—The total receipts excluding opening balance amounted to Rs. 139·41 lakhs against Rs. 138·24 lakhs in 1931-32. The receipts under "Local rates" increased from Rs. 75·80 lakhs in 1931-32 to Rs. 77·87 lakhs; under "Interest—for other purposes," from Rs. 91,000 to Rs. 1,14,000, under "Medical—Contributions from Government", from Rs. 13,68,000 to Rs. 13,85,000, and under "Medical—Sanitary fees and fines," from Rs. 11,540 to Rs. 39,267. The receipts under the latter head amounted in Khulna, Dacca and Rangpur to Rs. 7,527, Rs. 5,107 and Rs. 5,450, respectively, as a result of vigorous steps taken in these districts towards the control of adulterated food-stuffs. The receipts under head "Police" fell from Rs. 1,98,000 in 1931-32 to Rs. 1,78,000; under head "Education—Contribution from Government", from Rs. 212·6 lakhs to Rs. 208·7 lakhs; under "Miscellaneous—Contributions from Government", from Rs. 2·92 lakhs to Rs. 2·61 lakhs and under "Civil Works—Contribution from Government," from Rs. 8·60 lakhs to Rs. 8·10 lakhs. The decrease in the Government contribution was due to the necessity for drastic retrenchment in provincial expenditure.

5. *Expenditure.*—The total expenditure chargeable to current income rose from Rs. 139·04 lakhs in 1931-32 to Rs. 139·66 lakhs. The expenditure under head "Education" rose from Rs. 36·76 lakhs to Rs. 37·51 lakhs (the increase being mostly under the sub-heads "Maintenance of Middle Schools and Primary Schools and grants-in-aid"); under head "Medical", from Rs. 34·47 lakhs to Rs. 34·66 lakhs and under sub-head "Veterinary charges, from Rs. 1·73 lakhs to Rs. 1·82 lakhs. The expenditure under head "Administration" was, however, reduced from Rs. 6·96 lakhs to Rs. 6·89 lakhs; under head "Civil Works—Establishment", from Rs. 9·10 lakhs to Rs. 8·86 lakhs; and under head "Debts" from Rs. 10·24 lakhs to Rs. 9·44 lakhs.

The closing balance increased from Rs. 30·14 lakhs to Rs. 32·87 lakhs. It is satisfactory that in spite of reduced Government contributions district boards increased their expenditure on education and medical relief. [illegible]ay, however, be observed that reduction in the expenditure under "Civil Works" below the level of adequate requirements may neutralise the improvements made in the past and may eventually lead to the failure of the district boards in the performance of one of thier primary functions, viz., the maintenance of an adequate system of communications in the district.

The Commissioner of the Rajshahi Division reports that it is an unsatisfactory feature that many district boards have formed a habit of carrying over from one year to the next a large volume of unpaid dues, such as grants to schools, contributions to dispensaries and hospitals and bills of contractors and others. This state of things make it difficult to gauge the true financial position of a board.

The Commissioner of the Presidency Division reports that some district boards overestimate theiir probable income from cess and undertake large

commitments, only to find at the end that the board has been brought to the brink of financial bankruptcy. The importance of cautious and judicious framing of the budget cannot be too strongly emphasised.

6. *Education.*—The total income fell from Rs. 21·91 lakhs in 1931-32 to Rs. 21·58 lakhs. This was principally due to the reduction in the Government contribution from Rs. 21·31 lakhs to Rs. 20·96 lakhs. The total expenditure on primary education alone, however, amounted to Rs. 28·18 lakhs.

The number of board middle schools was 51 with 4,238 pupils and the receipts from them amounted to Rs. 33,838 against an expenditure of Rs. 1,13,165. This represented a net expenditure of Rs. 19·14 per annum per head from the resources of the boards.

The number of board-aided middle schools was 1,126 with 93,024 pupils and the grant-in-aid to these middle schools and 5 high schools totalled Rs. 7,38,344 representing an expenditure of less than Rs. 8 per head per annum by the district boards. The total number of upper and lower primary schools aided and maintained by the district boards was 51,840 as against 50,409 in 1931-32 and the [illegible]al number of pupils was 611,470 a[illegible]st 611,700.

The n[illegible] aide[illegible]ower primary schools f[illegible] from 38,141 to 36,427 but the number [illegible] aided upper primary schools rose from 8,047 to 10,846. The increase in the number of aided upper primary schools affords ground for satisfaction, as a large proportion of boys finishing their education in the lower primary stage lapse into illiteracy and this causes a wastage of educational effort.

It is a hopeful sign that the number of girls in aided upper primary schools rose from 65,803 to 97,323. No mention has been made in the reports of the number of girls' middle schools, if any, in the rural areas and of the amount of the district boards' grants thereto.

The total expenditure of district boards on primary education rose from Rs. 28,08,955 in 1931-32 to Rs. 28,18,423. The total income of primary schools from private sources, however, fell from Rs. 27,44,643 to Rs. 26,36,834. This is ascribed to the prevailing economic depression.

The 24-Parganas District Board maintained 23 free primary schools, and made a special contribution of Rs. 252 for the encouragement of indigenous games. It also paid Rs. 500 to Sanskrit tols for the advancement of oriental studies. The Jessore board maintained 50 free primary schools, and the Biss schools in Khulna district continued to function. The district board of Murshidabad contributed Rs. 50 per month to a high English school for girls. The primary schools in the Burdwan district were under the management and control of union boards except in the Asansol subdivision and parts of Sadar. In Hooghly three union boards maintained free primary schools under the Biss scheme. In Howrah 5 primary schools were maintained under the Biss scheme and 6 under the Griffiths scheme. In Midnapore the district board maintained in all 113 schools, and the Biss schools in Hooghly, Burdwan, and Bankura continued to function under the district boards. The district board of Rajshahi increased its expenditure by Rs. 24,387, but this was largely due to the payment of arrear grants to schools in the Lytton Bridge area of Naogaon where their payment had been suspended owing to a dispute. The Rangpur and Bogra District Boards proposed to make retrenchments by taking the retrograde step of closing down all their middle English schools, but were persuaded not to do so. Both the boards introduced drastic cuts in the pay of teachers and left the grants-in-aid to their schools in arrear. One district board in the Rajshahi Division was found to have diverted Government grants for education to other purposes. The question of the introduction of the optional scheme under the Bengal (Rural) Primary Education Act in seven districts where the district boards agreed to participate, was under the consideration of Government. The Dacca District Board directly managed 205 primary schools and also maintained one model middle English school. The Mymensingh District Board reduced the grants-in-aid to schools of all denominations by 25 per cent. The Faridpur District Board maintained 16 Biss schools. The Bakarganj board maintained 276 panchayati union schools, 163 unions being without such schools. There were 53 industrial and technical schools maintained or aided by the district boards, and these imparted instruction to 2,127 pupils during the year under review. Among industrial institutions thus maintained or aided by district boards were

the B. D. Pal Choudhury Technical School at Krishnagar, the Coronation Technical School and the District Weaving School at Khulna, the Moberly Junior Technical and Industrial School at Hooghly, the Industrial School at Belur, the Industrial School at Vishnupur, tthe Weaving Schools at Sultanpur and Suri, the Diamond Jubilee Industrial School at Rajshahi, the Technical School at Burdwan and the Kasi Kishore Technical School at Mymensingh. The district board of Bankura contributed Rs. 1,800 to the Bankura Medical School, Rs. 360 to the Music School at Vishnupur and Rs. 60 to the Girl's Music School at Ajodhya. The district boards of Darjeeling, Dinajpur and Pabna contributed towards the upkeep of the Sadar hospital at Jalpaiguri which is an integral part of the Jackson Medical School. The Deaf and Dumb School at Mymensingh continued to receive liberal grants-in-aid from the district board.

7. *Public health and medical relief.*—The income under head "Medical" fell from Rs. 15·82 lakhs in 1931-32 to Rs. 15·76 lakhs but the expenditure under the head rose from Rs. 34·47 lakhs to Rs. 34·66 lakhs, the main increase being under the head "Sanitation and vaccination," viz., from Rs. 17·44 lakhs to Rs. 17·76 lakhs. Government contribution rose from Rs. 13·68 lakhs to Rs. 13·85 lakhs. The number of dispensaries aided and maintained by district boards rose from 968 to 1,010. There was thus an average of one dispensary for every 70 square miles of area and for every 50,000 of population. There were 643 dispensaries maintained by district boards at an average cost of Rs. 1,730 per dispensary, and 367 aided dispensaries at an average cost of Rs. 902 per dispensary. The average cost of maintenance varied from Rs. 2,411 in Jalpaiguri to Rs. 752 in Faridpur. The district boards of Noakhali and Mymensingh aided 16 and 10 homeopathic dispensaries, respectively, and the district boards in the Rajshahi Division aided 80 such dispensaries. The system of charging fees, introduced in certain districts of the Presidency Division, was followed with success in the Rajshahi Division and quite a large income was derived from this source. The work of the rural public health organisations, for which district boards received grants from Government, was on the whole satisfactory, particularly in controlling epidemics and carrying on propaganda. Sanitary Inspectors did not always get timely information of outbreaks of epidemic in villages and prompt action could not therefore be taken in every case. The present intelligence system is far from perfect.

An experiment to control malaria by the use of plasmochin and quinine under the supervision of the Director of Public Health was undertaken by Government in the Memari thana of the Burdwan district. The Nabaganga-Mathabhanga scheme initiated by the Nandia District Board in co-operation with the Jessore District Board is reported to have been attended with remarkably successful results. The campaign against kala-azar by the provision of facilities for treatment in affected arreas was attended with good results in certain districts of the Presidency, Burdwan and Rajshahi Divisions. Special arrangements for the treatment of leprosy were made by the district boards of Midnapore and Burdwan, and by certain boards in the Rajshahi Division. Effective measures were taken by district boards for the prevention of small-pox. The Minister commends to other district boards the example set by the district boards of Jalpaiguri, Bogra and Pabna in maintaining female vaccinators. who did good work among [illegible]danashin ladies.

Action tak[illegible] the boards under the Bengal Food [illegible]lteration [illegible] 1919, resulted in appreciably checki[illegible] the sale of adulterated food-stuffs in c[illegible]tain districts. District boards are reported to be somewhat handicapped in checking the evil at its source as the place of manufacture of food-stuffs usually lies in a municipal area and the real offenders are usually not the local retailers but the firms which sell wholesale. The district health laboratory at Khulna with its bacteriological section did good work in food-stuff analysis and sanitary examination of water.

A virulent type of cholera prevailed in an epidemic form in the Bakarganj district. The board took vigorous steps by inoculating 177,898 persons with anti-cholera vaccine and disinfecting 3,744 tanks as a preventive measure in the affected areas.

Intensive vaccination was carried on in the Chittagong district and 86,938 primary vaccinations and 95,912 revaccinations were perfomed.

In the Rajshahi Division Government cinema parties which showed films on

health subjects along with others proved very popular and did valuable work in health education.

8. *Veterinary.*—The veterinary receipts decreased from Rs. 4,533 in 1931-32 to Rs. 2,446, but the charges under this head rose from Rs. 1,73,550 to Rs. 1,82,679, the increase being shared by the Burdwan, Rajshahi and Dacca Divisions. The Dacca and Burdwan Divisions showed an increase of Rs. 6,815 and Rs. 3,307, respectively. The increase of more than Rs. 4,000 in Faridpur was primarily due to the payment to Government of the last instalment of the arrear contribution towards the pay of the veterinary assistant surgeons, amounting to Rs. 3,366, which could not be paid in the previous year owing to financial stringency. Considerable progress was made by the Malda District Board in fodder-growing and improvement of cattle. The importance of making sufficient provision for fodder was again stressed by the Commissioner of the Rajshahi Division, as an important veterinary problem of the province is the chronic starvation of the cattle. Intensive propaganda would appear to be the most effective method whereby the villager can be made to realize that he will not get good ploughing for his fields or good milk for [illegible] children unless his bullocks and his [illegible] are well fed, and that his bullocks [illegible] his cows will never be properly fed until he grows good fodder for them. The public health demonstration and cinema parties preached this gospel during the course of the year, but a great deal of educative work obviously remains to be done. Many animals are, even at present, allowed to die of starvation, and far too many are in consequence imported from other provinces. Some of the boards paid considerable attention to the improvement of stock; and the Midnapore and Bakarganj boards maintained seven and eight stud bulls, respectively. In Malda Rs. 570 was spent on the purchase of young bulls for stud purposes.

9. *Civil Works.*—The total receipts under the head fell from Rs. 16,37,603 in 1931-32 to Rs. 15,68,884. The decrease was mainly due to the decrease in Government contribution from Rs. 8,60,242 to Rs. 8,10,814; in ferry receipts from Rs. 5,42,018 to Rs. 5,10,432; and in miscellaneous receipts from Rs. 35,342 to Rs. 18,953. The total expenditure under the head fell from Rs. 51,54,909 to Rs. 50,64,007. The main decrease was under "Original Works—Buildings," from Rs. 1,56,936 to Rs. 1,06,444; under "Water-supply (original)", from Rs. 5,48,529 to Rs. 4,43,356; and under "Establishment", from Rs. 9,10,959 to Rs. 8,86,314. The expenditure under head "Communications (original works)" increased from Rs. 6,19,473 to Rs. 6,58,648. The total expenditure on communications was Rs. 29·76 lakhs, representing about 40 per cent. of the total receipts from local rates. The increase in expenditure under "Communications" was due mainly to subventions from the Central Road Fund, rather than to any additional expenditure by the district boards from their own funds. District boards in general actually showed a tendency to curtail expenditure under this head for reasons of financial stringency. There was a large increase of Rs. 75,996 in expenditure from district board funds in the Rajshahi Division; the increase of Rs. 84,819 in the Dacca Division was due to expenditure against contributions from the Provincial share of the Road Account. In the Presidency Division all the districts reduced their expenditure on roads except the 24-Parganas which spent Rs. 9,988 more under the head "Communication—New Works" than in the previous year. The reconstruction of the Jhenidah-Magura Road, for which a total allotment of Rs. 1 lakh was received during the year under review and in the previous year from the Road Account, continued to make progress and a total sum of Rs. 55,948 was expended during the year on this project. In the Burdwan Division the decrease was shared by all districts except Bankura, the largest fall (Rs. 77,828) occurring in Howrah. The Jalpaiguri district board commenced the raising and shingling of the Madarihat-Falakata Road, with the object of providing an alternative outlet for the tea-growing area to the west of the Torsa river in the event of flood damage by the Teesta river putting the Bengal Duars Railway out of action. The Administrator of the Western Duars Market Fund contributed Rs. 12,000 towards the cost of this project and also advanced a loan of Rs. 20,000 to the district board for this purpose. The mileage of metalled roads was 2,603 against 16,526 of unmetalled roads and 20,326 of village roads.

10. *Water-supply.*—The total expenditure under this head fell from

Rs. 6,29,000 in 1931-32 to Rs. 5,51,924. The decrease was shared by all divisions except Dacca and Chittagong. Even in the latter two divisions the increase was small. In the Presidency Division expenditure on original works decreased in all the districts except Nadia. In Khulna the sinking of 127 tube-wells was undertaken. In all 49 tube-wells were sunk and 22 tanks excavated during the year by the local boards in the Presidency Division. The Burdwan District Board excavated 1 tank and sank 51 tube-wells, 58 masonry wells and 1 ring well, and spent Rs. 10,770 on repairs as against Rs. 7,841 in the previous year. The local boards in Midnapore sank 147 tube-wells and 19 masonry wells and excavated 2 tanks. In the Rajshahi Division Bogra was the only district board which increased its outlay on rural water-supply and sank as many as 239 tube-wells. The Commissioner of the Rajshahi Division has again suggested that allotments for water-supply should be distributed by the district boards among deserving union boards so as to supplement the funds which the latter are ready to contribute from their own resources. This would have the further advantage of enabling responsibility for the upkeep of the wells to be definitely imposed on union boards. The Dacca District Board maintained the water-works at Munshiganj at a total cost of Rs. 2,660. In Mymensingh 81 masonry wells, 51 tube-wells, 14 ferro-concrete wells and 2 ring wells were sunk and 8 tanks were excavated. Other boards would do well to follow the example of the Khulna and Faridpur boards which maintained special staffs for this purpose. Unless there is an agency for the supervision of tube-wells, to watch their working and to make repairs as occasion arises, the expenditure runs a risk of being wasted owing to the wells becoming unserviceable after a few years.

11. *General remarks.*—During the year under review most of the district boards felt the effects of the financial depression. The receipts from the road and public works cesses declined considerably in a number of cases, and the boards in the Presidency Division recorded a total decrease of Rs. 1,26,767 under this head. In the Burdwan Division, on the other hand, improved collection produced a general increase of Rs. 50,444 in receipts from local rates, despite the fact that there was a decrease in Birbhum and Midnapore. In the Rajshahi Division the district boards of Rangpur and Malda recorded a large decrease of revenue, but the Dinajpur board increased its income by Rs. 19,868, and the district board of Pabna showed an increase of Rs. 11,000 in receipts, about half a lakh more having been collected in cesses than in the previous year. The income from local rates accruing to the boards in the Dacca Division rose by Rs. 1,74,410, and in the Chittagong Division by Rs. 11,259. These increases, however, did not entail a return to financial prosperity nor did they restore receipts to their former level, and the exceptional economic depression resulted in serious curtailment of expenditure under various heads. While the majority of the boards succeeded in weathering the storm without serious disorganization of their activities in respect of public health, education and medical relief, they were only able to do so with the assistance of the recurring grants made by the Government and in some districts at the cost of the diversion of money from the head "Communications." The majority of district boards considerably curtailed expenditure on roads and bridges, and it is to be feared that this policy will result in future in difficulties of considerable magnitude in the form of a permanent deterioration of communications. The Commissioner of the Dacca Division reports that sooner or later the capital expenditure required for replacing existing bridges [illegible] tax every board's revenues to the utmost.

It appears from the Annual Audit Report for the year 1932-33 that in the case of several district boards pound and ferry rents were heavily in arrears for 8 to 15 years. The audit by the Finance Committee was also badly in arrears and there were cases of embezzlement and fraud in three district boards. The Minister hopes that Chairman and Vice-Chairmen of district boards will pay earnest attention to the avoidance of the irregularities mentioned above.

The Minister notes with satisfaction that with the exception of Bankura, district boards remained unaffected by the civil disobedience movement of 1932. Their relations with the district authorities were generally cordial, and on the whole their administration was carried on with a reasonable degree of efficiency. Definite evidence was forthcoming of a determination not to be influenced by political agitation to the detriment of local interests, and although much still

remains to be done in the way of effecient administration, the divisional reports on the working of the district boards in the year under review furnish striking evidence of the immense usefulness of these important local self-Governing bodies.

The Minister for Local Self-Government desires to record his appreciation of the good work done by the boards and in particular to thank the following gentlemen who have been particularly mentioned as having rendered meritorious service:—

STATEMENT OF OBJECTS AND REASONS.

The problem of rural indebtedness with which this Bill deals has for many years been the subject of anxious consideration on the part of various Provincial Governments: but it has been brought into fresh prominence and has become a matter of immediate urgency in Bengal since the year 1929 when a sudden fall in the prices of agricultural produce resulted from the worldwide depression in trade. The agriculturists of Bengal, particularly those of its most fertile and previously most thriving districts, have become involved in debt far beyond their power to repay and unless a remedy is provided the consequences may be disastrous to the province. The Board of Economic Enquiry which was appointed in December, 1933, submitted in its report of 26th November, 1934, recommendations for legislation, which they expected would be of benefit to creditors in no less degree than to debtors. These recommendations were based on the provisions of the Central Provinces Debt Conciliation Act, 1933, and the Punjab Relief of Indebtedness Act, 1934: but whereas these two Acts aim primarily at settlement of debts by agreement between debtor and creditor, the Board of Economic Enquiry proposed that powers be granted for settlement by compulsion in certain cases. Meanwhile, successful experiments had been made in Chandpur subdivision of Tippera district by way of inducing creditors to compromise with their debtors, and it appeared probable that much could be done elsewhere in Bengal on similar lines. Provision has therefore been made in the Bill for setting up Debt Settlement Boards of different types as circumstances demand. The first type would resemble those which have shown such promise in Chandpur subdivision: the second would exercise powers like the Boards established in the Central Provinces though somewhat wider: and the third might be granted powers to exercise compulsion in varying degrees on creditors who unreasonably refuse to settle debts amicably. The powers proposed are those suggested by the Board of Economic Enquiry, with various safeguards against their misuse. In addition, the Bill includes provision, as suggested by the Board of Economic Enquiry, for a simple insolvency procedure, the need of which was emphasized in paragraph 367 of the Report of the Royal Commission on Agriculture in 1928.

ADDENDA AND CORRIGENDA.

No. 5827F. — 10th August 1935. — The following corrections which have been authorised, are published for general information: —

Fundamental and Subsidiary Rules, 1st Edition (Reprint), 1929.

Government of India's decision.

Insert the following as Government of India's decision: —

(3) For the purposes of the application of F. R. 91 the period of voyage to or from India is treated as leave out of Asia during which leave salary is payable in sterling. This applies to all direct (*i.e.*, unbroken) voyages between India and a port outside Asia irrespective of the route followed and the time spent in Asia on the voyage, including stoppages incidental thereto (*e.g.*, for the purpose of transhipment); *i.e.*, it is meant to apply to all cases in which the period spent in Asia after embarking from India appears, on a liberal interpretation, to be a *bona fide* halt in the course of a voyage to or from Asia. The intention is, however, not to make leave salary payable in sterling when the voyage is broken in Asia at the volition of the officer or when he spends a portion of his leave in Asia before proceeding to another continent or resuming his duties in India.

Note.—The Government of Bengal have adopted this decision for persons subject to their rule-making control.

A certificate which is not embodied in the original sanctioning orders is not a valid certificate acceptable to audit.

BENGAL LEGISLATIVE COUNCIL DEPARTMENT.

NOTIFICATION.

No. 3223L.C. — 17th August, 1935.—The following report of the Select Committee on the Bengal, Agra and Assam Civil Courts (Bengal Amendment) Bill, 1934, with the Bill embodying amendments recommended by them, is hereby published for general information.

Report of the Select Committee on the Bengal, Agra and Assam Civil Courts (Bengal Amendment) Bill, 1934.

We, the members of the Select Committee of the Bengal Legislative Council to which the Bengal, Agra and Assam Civil Courts (Bengal Amendment) Bill, 1934, was referred by a motion carried in the Bengal Legislative Council on the 30th July, 1935, have the honour to submit this our Report with the Bill, embodying amendments recommended by us, annexed. All matter omitted by the Select Committee has been printed in italics and enclosed in square brackets and all new matter inserted has been underlined.

(1) The Bill was published in English in the *Calcutta Gazette* of the 29th November, 1934, before introduction.

(2) The Committee met for the first time on the 5th August, 1935, and concluded its sitting on the 6th August, 1935.

(3) We do not consider that the Bill has been so altered as to require republication.

(4) The changes made in the Bill are as follows :—

Clause 1.—We have completed the year of the Act in clause 1 (*1*).

Clause 3.—The figures "141" were a misprint for "114". This has been corrected.

Clause 5.—We have redrafted clause 5 so as to empower the Local Government to invest a Munsif with jurisdiction up to three thousand five hundred rupees so long as he holds his Court at a place where the Court of a Subordinate Judge is held.

Clause 7.—We have reduced the limits of "one thousand rupees" and "five hundred rupees" to "seven hundred and fifty" and "three hundred" respectively, as we consider the lower limits more desirable for the present.

While we recommend that the Bill, as reported on by us, be passed, we express the hope although we are assured that there is no such intention on the part of Government, that the extended powers now provided in the Bill will not result in adversely affecting, or be used to the detriment of, the financial prospects of Munsifs in the service of Government.

First Forecast of the Sugarcane Crop of Bengal, 1935-36.

(*Note.*—On an average of the five years ending 1933-34, the area under sugarcane in Bengal has represented some 7·2 per cent. of the total area under sugarcane in British India.)

Character of the season.—At the outset the weather was favourable for planting in East and North Bengal while elsewhere it was unfavourable for shortage of rain. Drought in March and April somewhat interfered with the germination and growth in some districts. Later on alternate rain and sunshine helped the growth and development generally. The present condition is reported to be satisfactory, on the whole.

Area planted.—The total area planted with sugarcane for the province is reported to be 324,700 acres this year as against 274,900 and 276,200 acres reported in the corresponding and final forecasts of last year. The large increase in area is mainly attributed to the increased demand and to intensive propaganda to restrict jute cultivation.

Dacca, the 12th August 1935.

Monthly Weather and Crop Report of Bengal for July 1935.

I. *Character of the season.*—During the month under review, the rain was in excess of the normal in two districts while in the rest of the Presidency it was below the average. The usual rainfall statement is appended.

II. *Progress of agricultural operations.*—Transplantation of winter paddy seedlings commenced but the progress of the operation was slow for want of rain. Harvesting of autumn rice was progressing briskly and that of jute proceeded slowly for want of sufficient rain for steeping.

III. *State of standing crops.*—The condition of standing crops was reported to be generally fair.

IV. *Prospects and probable outturn.*—The outturn of summer *til* was estimated at 81 per cent. of the normal. A satisfactory crop of autumn rice is expected.

V. *Damage to standing crops.*—Some damage was caused to jute by insects in places in West Bengal.

VI. *Condition of agricultural stock.*—The condition of live-stock was, on the whole, fair. Sporadic cases of cattle-disease were, however, reported from fifteen districts of the Presidency and from the states of Cooch-Behar and Tripura.

VII. *Failure of pasturage and fodder.*—Insufficiency of fodder was reported from parts of Murshidabad.

VIII. *Prices of food-grains.*—During the second fortnight of the month the retail prices of common rice of the cheapest quality rose in eight districts, fell in six and remained stationary in the rest of the Presidency. The prices ranged from 10 seers per rupee at Murshidabad and Darjeeling to 13¼ seers per rupee at Dinajpur.

IX. *The condition of agricultural population.*—The condition of agricultural population was, on the whole, fair, except in parts of Murshidabad, Birbhum and Bankura, where distress continues.

CALCUTTA, THE 17TH AUGUST 1935.

RESOLUTION—No. 4243Pl.

Read—

The Report on the Police Administration in the town of Calcutta and its suburbs for the year 1934.

The office of the Commissioner of Police was held throughout the year by Mr. L. H. Colson, C.I.E., I.P.

2. The strength of the force at the close of the year was 5,646 officers and men. The gross expenditure incurred was Rs. 45,01,311, but if receipts amounting to Rs. 9,03,774 be deducted, the net cost of the maintenance of the force was approximately Rs. 36 lakhs. The Calcutta Police District has a population of 1,196,734, so that the cost per head of the population is about Rs. 3.

The number of constables enlisted in the year [illegible]17 as against 89 in the previous year. Of these, 51 were Bengalees as against 40 in the previous year. It is a matter for satisfaction that recruits with a sound educational qualification continue to present themselves for enlistment.

His Excellency in Council regrets to note an appreciable increase in the number of punishments, specially of major punishments, and trusts this increase may prove to be only temporary.

3. The general health of the force continued good, the number of cases of malarial fever being considerably lower than in previous years. There were, however, 44 deaths against 32 in 1933. The average daily number of sick was 104 against 103 in the previous year. The effect of housing conditions on the health of the force is a subject which requires investigation. His Excellency in Council is pleased to note the improvement which has been effected in the police hospital both in respect of facilities for nursing and in equipment.

4. *Crime Statistics.*—There was a slight increase in the total number of cognizable cases reported to the police, but it is noteworthy that there was a welcome drop in all forms of serious crimes. The number of true cases of coining, robbery, murder, dacoity, rioting, burglary and receiving stolen property decreased being 40, 16, 21, 4, 21, 426, and 93 respectively against 56, 19, 28, 7, 36, 432 and 148 in the previous year. There has been, moreover a remarkable improvement in the percentage of property recovered to property stolen, the figure being 26·2 in 1934 against 11·9 in 1932 and 19·3 in 1933. Of the cases reported to the police, 94·6 per cent. were sent up. Of the cases tried, 97·3 per cent. ended in conviction.

The Detective Department assisted the thana police in 223 cases and investigated 147 cases independently, although it was under strength by two inspectors and three sub-inspectors who were employed in the Press and general intelligence section. His Excellency in Council has read with interest the account of the more important cases dealt with by the Detective Department and is impressed with the high standard of detective ability displayed by the investigating staff.

His Excellency in Council is also pleased to note the valuable work done by the Special Detective staff of the Port Police which resulted in the recovery of 14 revolvers, 3 automatic pistols and 234 rounds of cartridges, the arrest of a number of terrorists in possession of firearms and the externment of 22 arms smugglers and brokers from Calcutta under the Bengal Smuggling of Arms Act, 1934.

5. *Revolutionary crime.*—Although there were no cases of overt terrorist crime, the discovery of arms, explosives and ammunition of various types is a reminder that terrorism is still active and malignant, and it is a tribute to the vigilance of the Special Branch working in co-operation with the Intelligence Branch of the Bengal Police that the movement has been kept so well in check.

The most satisfactory result of the year was the success achieved against the dangerous group of terrorists known as the Bengal Volunteer Corps of the Sreo Sangha which has been responsible for many outrages. His Excellency in Council has much pleasure in recognising the loyalty, courage and devotion to

duty displayed by all ranks of the force throughout the year, and particularly of the Special Branch, which has so effectively strengthened the position of Government against the deep-rooted menace of terrorism.

6. *Labour*.—His Excellency in Council has noted with regret the increase in communistic agitation and propaganda amongst the working classes of the city. This disquieting feature in the labour situation of Calcutta seriously interferes with the legitimate activities of genuine trade unions, which alone can promote the welfare of the labouring classes and which His Excellency in Council is anxious to foster and encourage.

7. *Beggars*.—There was a striking increase in the number of beggars sent up for trial, there being 8,235 against 4,334 in the previous year. The procedure under the present law for dealing with this problem is far from satisfactory. Action absorbing much police time and public money not infrequently results merely in the discharge of the accused after a warning or a sentence of detention till the rising of the Court. Government would welcome suggestions from those who are interested in this subject, with a view to finding a practicable solution of what has become a pressing problem.

8. *Traffic*.—The setting up of the Traffic Advisory Board composed of persons interested in the traffic problems of the city was a welcome innovation introduced during the year. It is only with the co-operation of the public that the safety of the streets can be secured, and the new Board forms a valuable link with the police which should do much towards that end.

There was a decline in the number of fatal injuries due to street accidents. The number of persons killed was 99 against 118 in 1933. The number of injured, on the other hand, was 2,195 against 1,879 in 1933.

The report of the Public Vehicles Department shows an all-round increase in receipts from the various sources, the amount realised from the motor vehicles tax alone being Rs. 10,84,636, which is Rs. 1,18,269 better than in the previous year.

9. *Commendation of officers*.—His Excellency in Council has been pleased to read the tributes paid by the Commissioner of Police to his Deputy Commissioners, Assistant Commissioners and other subordinate officers and desires to take this opportunity of placing on record his appreciation of the services rendered by all ranks of the force. Thanks are due to Mr. Colson for maintaining a high standard of discipline and efficiency.

Order.—Ordered that a copy of this resolution be forwarded to the Commissioner of Police, Calcutta, the Chief Presidency Magistrate, Calcutta, and the Commissioner of the Presidency Division for information.

Ordered also that a copy of the report be submitted to the Government of India in the Home Department.

Ordered also that the resolution be published in the *Calcutta Gazette*.

Chief Secy to the Govt. of Bengal.

NOTIFICATIONS.

No. 10796P. — 27th August 1935. — The following notification issued by the Government of Assam is republished for general information.

G. P. HOGG,

Chief Secy. to the Govt. of Bengal.

The 12th June 1935.

No. 1752R.—In the notification dated the 7th May 1884, published at page 596, Part I of the *Calcutta Gazette*, dated the 14th May 1884, the boundary between the district of Sylhet and Hill Tippera (Tripura State) was described, for the portion extending eastward from the Iktiarpur masonry pillar to a point on the Langai river due west of the Chhatachura or Koylalyon Hill Station, as that defined on the maps of 1860-65 and marked on the ground by pakka pillars as ordered in Government letter No. 1265, dated the 31st March 1865. But owing to the erratic course of a streamlet named Murai chara a dispute arose regarding the correct boundary running along that streamlet and included in the notification mentioned above. This disputed portion of the boundary lying between the junction of the Murai chara with the Manu river and the Fenai chara post was surveyed jointly and demarcated by pillars in 1918-19. It is now found expedient to notify this portion of the boundary as follows:—

"From the confluence of the Manu river and Murai chara the boundary runs in an easterly direction up the midstream of the latter till it becomes broad and swampy for some distance on the south and east of the loop like area known as the "Bagher Dil," thence along the midstream of this broad portion till the chara resumes its normal course and from there the midstream of the said chara as surveyed jointly in 1918-19 by the Assam Survey Department and a surveyor of the Tripura State and shown in the map, then prepared, to a point about a furlong west of the Fenai chara post, where the Murai chara leaves the Sylhet Tripura State boundary and where a pakka pillar has been erected; thence direct to the Fenai chara post."

"This portion of the boundary has been demarcated with thirty pillars including the Dattagram pakka pillar and the Fenai chara post."
